About Programr

Programr is the world's online lab for students and enthusiasts to learn & become proficient in the art of programming.

Philosophy:

It is our strong belief that programming is best learned at your own pace in a self-taught environment.

We believe you shouldn't have to join expensive IT colleges or IT institutes to become a good programmer when you can do so right at your home at almost no cost.

Our goal at Programr is to give you enough skills to write sophisticated programs in your favorite language so that you can get a well-paying job as a programmer or enhance your market value even further.

A little about Programr:

At Programr users can code, compile & run projects right in the browser in almost any language. You can code & run command-line programs, web applications, mobile apps, database apps as well as rich media apps right in the browser.

Programr also empowers users to learn and master programming by giving them hands-on exercises to solve along with an Auto-Faculty who gives helpful hints. You can see the Auto-Faculty in action in our Challenges & Course exercises.

Users can create & share projects online, as well as tinker with each other's projects. Users can upvote & discuss projects at Programr and also share & embed them on their own sites or anywhere on the web.

We believe that tinkering & enhancing each other's projects is a great way to become proficient in programming.

Founders:

Programr is founded by Rajesh Moorjani, Santosh Surve and Dileep Dharma.

Rajesh, Santosh and Dileep are friends since the last ten years, and have coded and managed many systems projects and web projects for clients including Microsoft, Altiris (now Symantec), Doubleclick (now Google) and Sungard over the years.

We are located at:

USA:

Programr

39481 Gallaudet Dr. Apt 232,
Fremont,
CA 94538

India:

Programr

301, Bhuvaneshwari Apts
Opposite Gate 4, Abhimanshree Society,
Aundh
Pune 411007
Maharashtra

You can reach us via our contact form or drop us a mail at info AT programr.com .
Happy programming!

Urr, I don't care...? Get your spam somewhere else.

Text - December 5, 2012, 3:13 am

Agreed with Mava 100%. What is this thread even about?
