Hey everyone! Since I've been here I've seen a lot of great things in the showcase. A lot of cool artwork and what not! So I want to help contribute to that by releasing my own personal stock pack! This is going to be in three parts and I'll upload each bit separately according to category!

First category is going to be... Fantasy! This pack includes over 70 high quality renders for you to use including some popular ones and some that you may have never even seen!

Fantasy Pack | 104 Mb | 84 Images - Download:

Great Pack man, thanks for the post. Definitely some of the best renders I have seen. Nice Job.

Is it just a render pack?

What else is in it?

Everything you see in the preview images is in the pack. Each pack is seperated by category for convience.

No use to me in that case.

But I'm sure others will find it useful, thanks for sharing.
