I have been messing around with Adobe Photoshop cs6 and found a few Sites that may help out you guys too

So far this is what I've got.

FONTS

<http://www.fonts101.com>

This site is free. You'll download the font downloader and run it as admin.

The options will come up to install toolbars and other things, simply uncheck them unless you want them. Then unzip the font.ttf and paste it in your font folder. Then delete the files you don't want.

<http://www.stockvault.net/c/3d-renders>

<http://planetrenders.net/renders/thumbnails.php?album=3>

<http://www.officialpsds.com/>

The more that I find I will add.

If you have suggestions

Please let me know.

I hope this helps.
