Thread: [? \[TUT\] \[HOW TO SETUP jRAT\] ? \[N00B FRIENDLY\] ?](#)

Di?mond - December 9, 2012, 5:47 am

This is my first tutorial on how to setup jRAT with pictures. If this helped you any please let me know.

Go to this website <http://www.no-ip.org> and make an account.

See where it says, "Create my host name later" check that box.

Now click add host.

Then just follow along with what the picture says.

Now you will want to enter the email address you used to log in at no-ip.org

Then you will want to click "select hosts" and then save it.

Download jRAT from here: <http://jrat-project.org/>

Once you have downloaded it extract all the files.
Then click "run"

Now open port 1336 tcp udp.

Now go to this and see if your port is open.
<http://www.yougetsignal.com/tools/open-ports/>

Now go to build and then advance build, be sure to fill everything in.

Once that is done follow this picture.

Now go to Startup

<https://i.imgur.com/Bb05Q.png?1>

Pick the OS you want to infect
<https://i.imgur.com/pr5lS.png?1>

And you're done once you click build! ?
<https://i.imgur.com/ZRgmf.png?1>

I highly recommend you test it in SandBoxie, download SandBoxie here:
<http://www.sandboxie.com/index.php?DownloadSandboxie>

Enjoy your RAT! ?

ajbest192 - December 9, 2012, 6:12 am
thanks !! ill try this if this work,

SkyGuy - December 9, 2012, 6:16 am
Nice tutorial, hopefully this will save me some work lol.

ajbest192 - December 9, 2012, 6:28 am
sir can you help me set up my jrat?
using TEAMVIEWER? PLEASE

Hank Hill. - December 9, 2012, 6:45 am
I can vouch for this awesome man.
I just tried it on myself and I got a few slaves, very nice tutorial!

ofesmith1 - December 9, 2012, 7:09 am
can it infect system remotely without been detected

SkyGuy - December 9, 2012, 7:14 am
(Dec 9, 2012 08:09 AM)ofesmith1 Wrote: [\[CITE\]](#) can it infect system remotely without been detected
Well yeah because it's a RAT...

And you can use jCrypt or the built in FUD feature in the next update.

?CutestLlama? - December 9, 2012, 11:03 am
Amazing tutorial you've got there my friend. =D I think it'll help people out!

Dr.Penguin - December 9, 2012, 2:04 pm
Bumping thread for people that need this!
Thanks for the help Diamond!

Stev - December 9, 2012, 2:29 pm
A very nice tutorial of a very nice RAT, well done Diamond :)

Chopstick - December 9, 2012, 3:11 pm
I would recommend not using No-IP. I would prefer using DynDNS. They manage your DNS for you

so you don't have to download that stupid DUC just so your bots can connect.. Overall I say decent tutorial:)

Mycro - December 9, 2012, 3:18 pm

I've been looking into this and do you know if this is made for a Multi-Platform? Can it be used on Windows/Mac/Linux?

Thanks for the tut also.

Di?mond - December 9, 2012, 4:04 pm

Thanks for the tut also.

Yes, I'm pretty sure you can if I am not wrong.

Lahance - December 9, 2012, 4:07 pm

This was very helpful vouch for you babe ;)

calipso07 - December 9, 2012, 4:22 pm

thanks you for hrlp :)))

goood

very nice i will ad same tuto also tomorrow :))

Di?mond - December 10, 2012, 5:09 pm

Hope this has helped everyone a lot so far! If it did please post so I know or if I need to change anything!

Tiny Hippo - December 11, 2012, 4:40 pm

Vouchy for Diamond, good tutorial. Perhaps you could add a section for how to forward ports, that was the main problem I was having.

baka~ - December 12, 2012, 5:15 am

Thanks for this, will try it out in the weekend!

Hellsing - December 12, 2012, 4:24 pm

Thanks dude, very easy to understand.

Kakashi Hatak? - December 12, 2012, 4:35 pm

Very nice tutorial really easy to understand A+++

Pussy Machine - December 13, 2012, 3:10 pm

Great tutorial bro, I love it learned a lot from it c:

iCydia - December 15, 2012, 3:58 pm

Thanks for the method <3

Didn't know how to do this.

j-pr0 - December 15, 2012, 5:32 pm

Definitely worth giving it a try. I'm more familiar with botnets.. not so much RATS.

Ram0n.exe - December 16, 2012, 9:55 am

This is a very nice tutorial of a nice RAT

27style - December 16, 2012, 9:59 am

Is JRat undetecable for the AV's ? :)

Di?mond - December 16, 2012, 11:59 am

(Dec 16, 2012 10:59 AM)27style Wrote: [\[CITE\]](#) Is JRat undetecable for the AV's ? :)

Most AV's don't pick up jRAT. It's almost FUD.

Kingme45 - December 16, 2012, 10:00 pm

Hey i'm sort of new here, and new to this. I did the port forwarding to 1336, that's set. I made the no-ip just like it said, followed it all. Added my socket for 1336 and pass / enckey and then went to advanced build, changed the pass / enckey to (pass / enckey) and then changed my IP in there to the one i made with _____.no-ip.biz and then checked the stuff it said, saved it as a .jar. I opened it in sandbox, my connection shows up in there. I sent it to a friend, it doesn't show up for him, what am i doing wrong? help appreciated! One thing it may be, is that it does now allow me to run "run.bat" so i have to run the "client.jar" file for it to open.

I've added you on Skype, I need to setup it for you.

James Franco - December 19, 2012, 8:22 pm

Damn nice TUT, +3'd you <33, Well job diamond, 420 blaze it.

Premortal - December 21, 2012, 11:00 pm

Wow, tons of descriptive pics and information. Thanks!

apex4 - December 22, 2012, 1:15 am

GOOD TUTORIAL THANKS FOR the help :]]]

Anon D - December 22, 2012, 1:16 am

Thanks OP ! I'm gonna try this out later tonight :)

iDontHustle - December 25, 2012, 12:23 am

Amazing tutorial you've got there my friend.I think it'll help people out!

CroakyWoaky - August 22, 2014, 7:02 pm

I add a socket and everything how your supposed to but the port isnt open.

palaber - January 12, 2015, 1:54 pm

Hey, is it possible to use united-domains.de instead of no-ip?

Last Resort - January 13, 2015, 1:10 am

Thank you, now I understand how to setup a jRAT.

_False - January 13, 2015, 4:40 am

nice tut man...should really help out the 1st time ratters!
jRAT A++

WhiteVader - January 13, 2015, 1:40 pm

Someone has been grave digging I see...

GoodFriend777 - January 25, 2015, 3:32 am

Anyone knows how to do FUD server? or how can I buy?

Skyneta - November 23, 2015, 5:36 am

Re-upload please.....

NeckSkyZz - November 29, 2015, 10:36 am

Tnx man, I will check it later

comandoz - November 29, 2015, 11:18 am

jrat is not stable and outdate .

jkavdaju - November 30, 2015, 9:47 pm

I really miss istealer. I used to get hundreds of accounts with that shit. Thanks for this!

sebastiancardona007 - December 12, 2015, 12:37 pm

Hey the link of the jrat download is not working

SecureBitcoin - December 12, 2015, 1:43 pm

there new website is jrat.io ignore the security warning lmao

MotherFlucker - January 5, 2016, 3:42 am

Man I dont get it where do you fill in your no-ip credentials. How does jrat know which no-ip adress you're using?

arthurdog - January 5, 2016, 2:15 pm

Thanks this looks really great.

scuba2409 - January 6, 2016, 6:27 am

Thanks for the tutorial well done

?Enlightened - January 6, 2016, 7:09 am

great tut, now I know where my username went lmao

mcat71090 - January 6, 2016, 5:33 pm

nice tat..very clear and concise thanks

Anonymous_Black_Hat - April 3, 2016, 8:00 pm

what ever you do dont use no ip its monitored by microsoft

Fire_Fire - April 3, 2016, 11:19 pm

Don't use no ip. There was a dispute between no-ip and Microsoft and Microsoft suspected that no-ip's domains are used for malicious activity

<http://www.noip.com/blog/2014/07/10/microsoft-takedown-details-updates/>

pandafoot1 - April 7, 2016, 2:02 pm

Could I get an updated jrat download link please?

notdefined - April 18, 2016, 10:43 am

Hello,

i've a urgent question.

I lost all my data including my jRat Password and jRat Build.

At least i can remember the ports which were used.

Is there any way to get rid of the encryption mechanism and let the client connect? Is there any way sniffing the password when connection appears?

Ive tried to disassemble the JRat Build and get ride of the encryption/handshake process but couldnt find the routine.

Regards!

ALLSAIL999 - April 18, 2016, 2:53 pm

thanks for the info but i have this stupid bug i think it's with this njRAT what i am using and this bug making the server file crash Argh ...

Ac3Chat - April 18, 2016, 3:50 pm

thanks for this im still new and need all the help i can get

billou - May 10, 2016, 2:05 am

great work friend thxxxxxxxxxxxxxxxxxxxxx

Teach Me Master - December 19, 2016, 6:47 am

Nice tutorial :)

The probme now is that the official jrat web doesnt work.. so we should download some infected copy of the controller of the jRAT.

Thanks.

b4rc0de - December 22, 2016, 7:22 pm

going to try this out how is jRAT last time I was into RAtIng I used Dark Comet when that was a thing xD What does jRAT do? Same as DC?

brizy007 - June 6, 2017, 11:44 am

i tried setting up please can i get your skype id?
