Yes the reason the site might be getting ddosed is because I use a different hosting company for the website than the server side. So the server side(your website) won't be getting ddosed when your with my hosting company. Our side is hosted on different servers than my own.

Tiny Hippo - December 21, 2012, 4:26 pm

Great sales thread. You might want to ix a few things for the bandwidth...

Shared - 2400 GB
Reseller - 1400 GB
Master - 1200 GB
Alpha - 1000 GB
SA - 1000 GB

The bandwidth rates go down as the price goes up? o.o

.Ganja - December 21, 2012, 4:27 pm

No, this is to even out all packages. If you have Super Alpha with all that bandwidth it would slow the server. So I evened it out.

Don't recommend this hosting company, bought 3 months hosting prior to using and used it for about 2 weeks, and it has been down at least 70% of the time I used this company, recently switched companies due to the major downtime, the support is also pretty unreliable and usually takes longer then 24 hours to receive a response, they used to have live support but not anymore, and the majority of the times the support representatives don't seem to understand basic English skills and aren't really any help at all.

Eclipse - January 16, 2013, 4:32 pm

Sad no more ddos protection towards the server... But speed it great

Dr.Penguin - January 17, 2013, 12:52 pm

I wouldn't buy this hosting if I was you..

Lol, your just mad because I "scammed" you with my API. Then you called me a prick. So I scammed you? Maybe you should watch what you say next time. Hosting is working fine. Your suspended because of your stupid actions.

That is not a legitimate reason for suspending someones service. Business representatives don't just 'stop' doing business with someone because they dislike them. You basically just said that you scammed him because he called you a prick. If I were you I'd just stop making yourself look like even more of an idiot that everyone already sees you for, before you say something that actually does get you banned.

.Ganja - January 17, 2013, 1:11 pm

This hosting is done anyways. If you try to order the stock is 0. So I really don't care anymore. I'm getting to much income so paypal is limiting me and making me report taxes.

You don't have any time to 'get off the servers'
Can't you see? OP is a scammer and has admitted it numerous times.

Dr.Penguin - January 18, 2013, 7:48 am

You're fucked.
He is just stealing your money.
He doesn't respond to anyone, he doesn't give a shit.

Shot Caller - *January 18, 2013, 9:30 am*

You shouldn't of even opened a hosting company if you don't even have a business PayPal. This is useless and because of my previous post the 3 month account I had with dexhosts has been deleted because Ganja is mad. Don't recommend using for anything, he obviously cannot keep a service up and running for long.

Eclipse - *January 18, 2013, 9:34 am*

Luckily my 3 month contract is almost over

Pumpkins - *January 18, 2013, 11:44 am*

I hope these rumours are false. This is the most reliable host i've found yet.

Edit: Plus I need my files.
