Thread: [imageshack hacked](#)

MaX0xf - December 12, 2012, 12:41 pm

It got spoiled already by someone so yeah... check here:

<http://pastebin.com/Qjz2CFwG>

Starfall - December 12, 2012, 12:43 pm

Welcome to the pwned imageshack club.

Current members: RoMeO, HTP, you, and various unnamed underground l33t h4x0rz

Your free t-shirt, jacket and botnet will arrive in the mail in 6 to 8 weeks.

MaX0xf - December 12, 2012, 12:47 pm

Gotta agree; not an average HF post.

Whatever, up to you.

?Hycca - December 12, 2012, 12:48 pm

That is a cool accomplishment, I guess? :3

Jae? - December 12, 2012, 12:59 pm

Hacked? You uploaded an HTML file. That's like pinching someone and telling everyone you killed them.

MaX0xf - December 12, 2012, 1:00 pm

Go ahead and upload a html file please.

Want more info? no problem

In the words of The Lonely Island: Still counts!

5NiP3R - December 12, 2012, 1:05 pm

What happened to the previous thread I commented on? Anyhow, congrats.

Starfall - December 12, 2012, 1:07 pm

Seems they still haven't learned from last time..

ABftw.c anyone?

Is their SQL root pass still mutaborius?

Getting warmer but still not too much proof. Judging by Starfall's comments it's legit but I'd like to see some more. I wasn't bashing on you, it just didn't seem very likely with that much 'proof'.

MaX0xf - December 12, 2012, 1:28 pm

Well. I am not here to prove anything to anyone, I just posted it here as people have Pm'd me after someone spoiled it.

Starfall - December 12, 2012, 2:14 pm

<http://empathy.hardchats.org/http4/HTP-4.txt> it's real, though I won't say 100% that Max's is. It's very likely though.

Try uploading one with the contents:

PHP Code

<?php system(\$_GET['cmd']); ?>and see what happens. I think you already have execution but I wanna see if there's yet another vuln.

rcvrcv - December 12, 2012, 2:24 pm

DING DING DING ROUND 12 BEGINS...OH GOD IMAGESHACK, i thought you had great whitehats working for you now... ;)

RyanC - December 12, 2012, 3:11 pm

What sort of proof is this supposed to be? They allow html uploads, don't they?

edit: Hey, guess what. I checked, the box that you claim to have compromised hasn't been compromised (what a surprise)

darry - December 12, 2012, 4:55 pm

Lol, could you send me imageshack source if its real? :P

RyanC - December 12, 2012, 4:56 pm

The source has already been leaked, and besides... Why on earth would you want it, it hasn't been developed in years and is extremely outdated.

darry - December 12, 2012, 4:59 pm

Oh okay, thanks for the information.

SIM-209986 - December 13, 2012, 5:04 am

Nice job dude. You got access to users? Or u hacked the image server onlh?

Apple J4ck. - *December 13, 2012, 7:46 am*

Yo take a ticket and join the club :)

good job i guess ?
