Thread: [Why have free crypters and pay crypters?](#)

roni2228 - December 12, 2012, 3:01 pm

If have crypters that FUD 0/35 AV for free.

So why have crypter that cost money if they do the same FUD?

I don't understand it...

And more question, If I am doing my file with virus FUD, Can I send it for many peoples or for only one?

And how much time this file made become not FUD?

Thank you, Beginner hacker :}

Vandal - December 12, 2012, 3:04 pm

If the crypter is private then it is easy to keep it FUD. Public free ones become unFUD fast.

Paid ones are almost always FUD as they update them every time they aren't. They almost always have more features.

You can send it to multiple people

Depends on the crypter and who gets the crypter. More people who have it the worse as most skids will scan on VT or upload it to DropBox or something.

amus3d - December 12, 2012, 3:07 pm

A paid crypter is more HQ as it should be regularly updated and work with many functions.

Skids to things that get it detected like upload to Virus Total and such, however this wouldn't happen as much with a paid crypter because skids are also poor leechers. If you understand that at all.

- VandalWhat is the best paid crypter in your opinion?

And If I'll buy crypter in 10\$ for LT and crypter in 50\$ for LT (not the same crypter), have a different or not?

I recommend EnvyProtector, I use it myself.

I don't understand what your second question is asking. Please rephrase it.

Could you tell me what free crypter you use? Thanks in advance

koyaa - June 17, 2014, 7:00 am

Can anyone tell me more about data protector crypter?

Thanks.

x41N - June 17, 2014, 7:04 am

If you want the best quality you are going to want to go 100% private, meaning you are the only person who owns the crypter, besides the coder.

Cannooo - June 17, 2014, 7:44 am

Because free crypters are really going to be detected soon if it's FUD at that time. Most paid crypters are getting updated by the developer and thus it will be FUD for long time.

gr33nhornet - June 17, 2014, 7:53 am

This thread is from 2012, why has it just been revived?

moller - June 19, 2014, 3:31 pm

i need a good crypter 0/47 fud for free ! any ideas

Yes, give up and pay for one lol

You arent going to find anything

Drunken Mastermind - June 19, 2014, 3:41 pm

Because a crypter needs to be updated. A free one won't be FUD for long.

I think he's asking whats the difference between an expensive crypter and an inexpensive crypter

Brado - June 20, 2014, 3:32 am

Cause free crypters will be detected after 2/3days.. And it will take a much longer time to make it fud again, cause it's free ofcourse! Paid crypter has also a lot of features! And if the are detected it will not take longer than 2 days when it's undetected again. I would advice you to take a paid one!

Hopsin - June 20, 2014, 3:44 am

Sure. "Paid" Crypters are always the best. Ever heard of free crypters which are fud + fud updates for free? Oh god.

/sarcasm.

josporter22 - September 27, 2015, 9:16 am

Please give me the name of the free cryter let me try it.
