Nice dude

Good luck with it :)

I can see you're very skilled

Anon D - December 12, 2012, 11:14 pm

Pretty impressive, keep going! Make that list huge :3

Teferi - December 12, 2012, 11:14 pm

I am missing a 1337 text box :\$

Seen that deface a 1000 times..

Anyway, good job

Starfall - December 12, 2012, 11:15 pm

Wow, you can dork, use a public exploit and then waste your exploited servers!

Mountain Dew - December 12, 2012, 11:31 pm

Just sayin, but they are all on the same server....I have seen that deface 100 times. You also defaced a site for child leukemia. But otherwise nice job in exploiting the server. Keep it up :)

<http://www.childrenleukemia.ge> ?? seriously dude?

Cyber Criminal - December 13, 2012, 12:30 am

I've seen this deface before, I can see you tweaked it a bit but should still give credit man :/

Mormaii - December 13, 2012, 1:01 am

A children Leukemia site? That's not nice of you Abul, don't make me go to Dhaka.

logging1220 - December 13, 2012, 3:53 am

<http://www.childrenleukemia.ge/> you are very funny... i hope you die on leukemia !! ...

Sorry but this is very poor .

rekkantur12 - December 13, 2012, 4:55 am

Nice woork man, Keep the good work up! :)

I hope these all aren't on the same server / same exploit. Could you tell us what the exploit was?

windy - December 13, 2012, 6:22 am

XD i need Help to get the Login info for this website :3

And this goes the same for me :)

Honestly what did you get out of defacing, especially a leukemia site?

tbh, the leukemia site was the only site there worth defacing.

Noobalicious - December 13, 2012, 7:45 pm

Who the fuck comes up with these website names haha :P

wisecheetah.com? dafuq? lol...

Anyways, on a more important note containing more than just a simple mind-fuck..

The Good:

That was actually a pretty kick ass deface page...

It was smart disabling the right click. Thank you for including this in your deface page. I will now incorporate this into mine :-)

Well done on the quantity of websites.

I enjoyed your favicon(s). I am quite interested on how you managed to make them change.

I am also interested in how you managed to make the (please excuse my ignorance in web design) title which appears in a tab in a web browser static. Did you just have a bunch of:

Code <title>titlegoeshere1</title>

<title>titlegoeshere2</title>

<title>titlegoeshere3</title>

The Bad:

Not too fond of the music, but hey, that's just my preference. Who am I to judge it.

but I am assuming English is not your first language. Not meant to troll... but... "You should be ready soon for get fucked again" is an invalid argument and doesn't exactly make sense... The music might be appropriate for the wise cheetah site though...

All in all...

Props to you. Keep it up, your doing a fantastic job in my opinion.

But, please update the grammar.
