Thread: [\[TUT\] How To Setup Darkcomet RAT In Depth + Portforwarding \[NOOB FRIENDLY\] \[Ebook DL\]](#)

biotech - December 13, 2012, 10:21 am

This is my first tutorial I have written for HF I know there are many but I want to go make it user friendly as possible!.

How To Setup Darkcomet RAT In Depth

Part 1: How To Setup No-IP

I have seen many guides related setting up Darkcomet and even though some have pictures and some don't they really don't appeal to me so I am making a nice in depth comprehensive guide.

1. Download Darkcomet <http://www.mediafire.com/?t18hn4u2yap1cvw> (took this out of another topic cannot remember which one)
2. Unpack to desktop or other location

Now that you have done those 2 simple steps the next step is rather easy. In order for your server to connect to you, you will need a dns that will update along with your IP so your server will always connect.

Create a account at <http://www.no-ip.com/>

Create a host by:

1. Clicking on Host/Redirects and then on add host.
2. Click in hostname and create your own for instance test then in the drop down box pick a domain name in this case it is zapto.org so your full hostname would be test.zapto.org. The IP Address etc. will be entered automatically.
3. Once completed click create host.

The next step is to download No-IP DUC <http://www.no-ip.com/downloads.php?page=win>

Once it is downloaded installed it enter your username and password for username and then select your domain name and the IP will update automatically.

Part 2: How To Setup Darkcomet + Port Forward

First port forwarding now that is a problem I use a livebox and you use something else so best thing to do is find a guide on here <http://portforward.com/>. The next thing you do once you are in your router port forward 1604 on TCP and UDP.

Now all that is done lets get on to setting up Darkcomet.

1. Run Darkcomet
2. Once open click Darkcomet on top left and click client settings
3. Once you clicked settings click on No-IP Updater and fill out the relevant information.

Now all of that is done you are ready to create a server and start spreading!.

Part 3: Creating A Server

This next part is really simple! And rather quick.

1. On the top left click Darkcomet RAT got to server module then full editor
2. Now you will see the screen below!

- Process Mutex: Click it a few times
- Server ID: Give it a ID so you know what it is
- Profile Name: Pretty self explanatory.

3. Click network settings.

Ok this one is a important step

- IP/DNS put in your No-IP.com host you made and the port 1604 which is what you portforwarded and then click add.

Ok now you want to click build the stub and tada you created your server if all is done correctly you should see a victim if they open your file if not test it on your self using sandboxie.

If all goes well you should see this:

I also forgot to add that the server will not be FUD you will need to encrypt it so anti-viruses will not detect it. (This will be a new tutorial)

I hope this tutorial was helpful and if there is anything I can add please let me know! I also made it into a nice Ebook format so people can use it where ever and even archive it!.

SIM-111414 - December 13, 2012, 11:28 am

Thanks for a nice and HQ tut mate.

Thanks for sharing.

I am sure it will help a lot of HF members. :)

biotech - December 13, 2012, 11:39 am

I am hoping so, I can't give much back to the community but I can give some :)

kr3nmousala - December 13, 2012, 12:38 pm

Good tutorial! Thank you! that helps me alot, please more like this! :)

biotech - December 13, 2012, 1:47 pm

I will be adding some more in the next few days on how to spread if you have any questions don't hesitate to ask.

StrikeBooter - December 14, 2012, 7:25 am

wow thanks you man...Thanks for this tut :!!!

The Prophet - December 14, 2012, 7:27 am

good contribution, hope to see some more tutorials from you..gl

Haxxr - December 17, 2012, 7:34 pm

I did the same exact steps and followed many tutorial yet for some reason my slave won't show up!
:/

biotech - December 18, 2012, 1:34 am

If you need help feel free to pm me but check out your port forwarding thats probably the problem if you followed all my steps.

133720 - December 18, 2012, 4:05 am

i enter the port 1604 and i test my computer but i don't work why?

biotech - December 18, 2012, 5:06 am

Have you port forwarded correctly? and the ip you used to portforward was your internal?

If you are unsure go to command prompt and type in ipconfig and look at your IPv4 Address that will be your internal!

look at my image in part 2 where it says server ip address that is my internal.

There is a example in the spoiler my IP doesn't match this one because it is a different computer.
Spoiler [\(Click to View\)](#)

kwibjo - December 18, 2012, 5:32 am

If I use canyouseeme.org to test the port 1604 it returns with 'connection timed out'. I don't know what to do.

biotech - December 18, 2012, 5:37 am

That means you haven't port forwarded correctly. If you look at the link in the post that will help if not I will help just add me on skype mredjones

poolpy11 - December 18, 2012, 7:14 am

It does not work. Cybergate is better, I'm using it without problem

biotech - December 18, 2012, 7:25 am

(Dec 18, 2012 08:14 AM)poolpy11 Wrote: [\[CITE\]](#) It does not work. Cybergate is better, I'm using it without problem

This tutorial works fine aswell as darkcomet but some times people miss a step or don't understand it fully. Thats why I am trying to help.

The solution isn't to go get another RAT it is to learn why this one isn't working so you learn and can help others.

poolpy11 - December 18, 2012, 7:29 am

(Dec 18, 2012 08:25 AM)biotech Wrote: [\[CITE\]](#) This tutorial works fine aswell as darkcomet but some times people miss a step or don't understand it fully. Thats why I am trying to help.

Okey. Do you have skype to help me? PLease help!

biotech - December 18, 2012, 7:37 am

I do add mredjones for skype help :)

cientes - December 18, 2012, 11:03 am

I need help with Forwarding a port. My modem model is an Huawei Echo Life HG532e, im going into the advanced section of then the NAT tab and port mapping tab to port forward without success. My big problem is that theirs no guides on my specific modem model on how to port forward so im ive been looking at some guides with very similar control layouts but ithere really useless since my modems control panel does not have the option to input my an IP.

These are Shots of my modem config panel.

[\[IMG\]http://img690.imageshack.us/img690/1725/capturexd.png\[/IMG\]](http://img690.imageshack.us/img690/1725/capturexd.png)

[\[IMG\]http://img841.imageshack.us/img841/7237/capture2ae.png\[/IMG\]](http://img841.imageshack.us/img841/7237/capture2ae.png)

[\[IMG\]http://img28.imageshack.us/img28/233/capture3ia.png\[/IMG\]](http://img28.imageshack.us/img28/233/capture3ia.png)

Ive input the Port i want to forward to 3**1

Im not sure were to input my IP address although ive tried imputing my IPv4, DNS and the no-ip.com provided host ip into the "mapeo de puertos" or Port Maps in English shown in the first image.

brohama66 - December 18, 2012, 11:06 am

Very detailed and straight forward! Thanks a lot!

biotech - December 18, 2012, 11:38 am

cientes if you need help add me on skype mredjones I don't mind help :)

brohama66 thank you if you want any more tuts let me know what ones :)

Repentant - December 18, 2012, 12:09 pm

Very nice Detailed tutorial Bro keep up the grat work!

biotech - December 18, 2012, 1:59 pm

I am trying :) thanks for the positive feedback it entices me to work on more! :)

Encrypting - December 31, 2012, 1:08 pm

This tutorial looks decent, going to just post here so I can come back later to it.

7DjDoctor7 - December 31, 2012, 1:31 pm

Thanks, nice detail and good for noobs, worked for me

biotech - December 31, 2012, 1:38 pm

Glad you liked it if you want any more of a different kind please let me know :)

lewis188 - January 1, 2013, 7:12 am

(Dec 18, 2012 05:05 AM)minkoko Wrote: [\[CITE\]](#) i enter the port 1604 and i test my computer but i don't work why?

Go to Socket/Net and right click in the boxes, then click add port to listen type 1604, author?

biotech - January 1, 2013, 7:13 am

Make sure your port forwarded correctly to start with :)

lewis188 - January 1, 2013, 7:16 am

(Jan 1, 2013 08:13 AM)biotech Wrote: [\[CITE\]](#) Make sure your port forwarded correctly to start with :) Don't you have to make sure DC is listening on port 1604? I'm no expert but mine didn't work till I did that :)

biotech - January 1, 2013, 8:53 am

It automatically listens on port 1604 but I have had a bug where I had to tell it to listen which fixed the problem, but it does it automatically as it is the default port :)

STU100 - January 1, 2013, 11:32 am

more great info here. thank you for taking the time to explain it all.

POMA - January 1, 2013, 2:05 pm

Great tutorial for beginners. Thanks for sharing!

TheDwarfGuy - January 1, 2013, 3:00 pm

Looks great, Thanks:) ill be trying it soon!!

biotech - January 1, 2013, 3:08 pm

Glad you all liked it any questions please ask :)

Annoited - January 2, 2013, 9:45 am

Thanks alot mate! :D Learned alot and hope you make more tutorials.

Roadstar - January 2, 2013, 12:51 pm

Thank you, helped me a lot. ?

iaffliction92 - January 2, 2013, 3:21 pm

Hey! Great tutorial!! Im about to start using it in a minute... but i have a quick question...

so i want to send it in an email, and after they click it, and i see it on my DarkComet screen thing, what do i do next to just screen monitor them and go into emails and files?

biotech - January 2, 2013, 4:21 pm

Totally up to you once you have your slave thats what they are your slave but I do have other

tutorials out there for instance money making.

Do not forget your server is detectable unless you crypted it.

iaffliction92 - January 2, 2013, 8:11 pm

Do you know any good free crypters?

biotech - January 3, 2013, 2:34 am

Insanity crypter has its merits but check the tools are ago see what you can find :)

Anonymous944 - January 3, 2013, 4:10 am

I did everything like you and I start in the sandbox server nothing happens...
what can be problem ?

biotech - January 3, 2013, 5:07 am

I don't know there could be many.

- 1) Make sure portforwarding is correct
- 2) Click on network where you put your dns in and make sure it only shows your dns with port not any others
- 3) Click Darkcomet RAT and click on listen then just click the button listen leaving the port alone see if that picks it up.

If it doesn't then please add me on skype and I will help you out :) mredjones

perestacy - January 4, 2013, 5:23 pm

BIOTECH, please i wouldnt mind to have you on my skype coz i will like to get my RAT FUD and also how to change the icon incase i want my RAT not to appear as exe file but pdf icon, can u please pm me ur skype or any contact, becasue am new here and my head is spinning for days coz i cant get it

biotech - January 5, 2013, 12:59 am

Sure but you could try my extension spoofer and file binder I released and my Skype is mredjones

Profiled - January 6, 2013, 1:41 pm

thanks, really good guide, but I'm still having trouble portforwarding.

Anyone know how to get help for a echolife router? pm me if you can help. thanks.

pepermint - January 6, 2013, 1:49 pm

Verry good, thank you. everything was work for me :)

Dangerous Hacker - January 6, 2013, 2:17 pm

hi brow i added you for some info if u get me plz chat with me...

biotech - January 6, 2013, 2:23 pm

Sure I will accept you in the morning and glad it helped everyone :)

WeAreBoo - January 16, 2013, 7:43 pm

Thank you!!!! Never would have gotten this without this tut!

B1G_BaNaNNa - January 16, 2013, 10:00 pm

Very good guide man. Great job. Gonna try it now

biotech - January 17, 2013, 8:36 am

Very cool, I am glad you all liked it! if there are any problems etc. feel free to contact me :)

barbyboy - January 21, 2013, 12:09 am

Good tutorial! Thank you! that helps me alot, please more like this! :)

ZinxHD- - January 21, 2013, 5:18 am

Yo bro when i click Darkcomet-rat at the top left after i update the no-ip it doesnt pop up module, but, when i downloaded dark comet it came the 1 u use and another part seperate which is the module what do i do i need help

biotech - January 21, 2013, 5:25 am

You click DarkComet RAT top left, then go down to server module, then click full editor if it isn't there then take a screenshot so I can help you more :)

ZinxHD- - January 21, 2013, 5:37 am

right so this is what comes up, <https://gyazo.com/1f346fe610d999c5fb858408b2c0d83b> missing the module part, by the way these are the 2 things i gotwhen i downloaded the darkcomet <https://gyazo.com/797ba54e26a0bc385c958e90a5abee49>

biotech - January 21, 2013, 7:07 am

here is a download link to the version you need of dark comet.

<http://www.mediafire.com/?wy2csx1oi6u41uw> I think your running the wrong version there (=

alexlandonflicksss - January 21, 2013, 7:20 am

Awesome Tut sir... Love the ebook idea too...:-)

biotech - January 21, 2013, 9:42 am

Glad you liked it sir and if any one has any problems post here, send me a pm or add me on skype mredjones

IndiependentGamer - January 23, 2013, 7:25 pm

Very good tutorial and helped a lot, thanks mate!

biotech - January 24, 2013, 8:30 am

Thanks I'm glad it helped you out :)

xCyaNiiDzZx_HD - January 28, 2013, 6:45 pm

Thanks men I really I appreciated your help

el_rey - January 28, 2013, 7:40 pm

Good tutorial! Thank you! that helps me alot, please more like this! :)

Zabuza? - January 28, 2013, 8:44 pm

Nice tutorial, keep it up! I think I may consider using DarkComet for once :P

colormonster - March 31, 2013, 9:48 pm

What version of DC is this? is it 5.3.1 or legacy?

biotech - April 1, 2013, 3:28 am

5.3.1 I thinkniprovided a download link in the main thread for it.

FluxTrap - April 2, 2013, 8:12 am

I cant post pm already but i cant connect to the no-ip shizzle.

VeteranIV - April 2, 2013, 11:22 am

wow this is a very detailed tutorial, thankyou!

kill3ry0u - April 2, 2013, 11:38 am

Great tutorial! this helped me alot
Thanks!!

marcusx - May 2, 2013, 7:34 am

thanks for this tutorial is very good

Olof - July 23, 2013, 9:04 am

Thanks for this high quality tutorial. "NOOB FRIENDLY" this will help out alot of beginners. I hope to see you make some more good tutorials in the future.

Nullezz - July 23, 2013, 9:24 am

thnxx this helped mr veryyy much thanx dude

sophie.hacker - July 23, 2013, 9:54 am

Biotech are you available for hire to talk me thru each step if required? Total newbie.

Happy to pay.

biotech - July 23, 2013, 11:01 am

I don't need to be for hite just add me on skype :) mredjones

SWEET_GIRL - July 23, 2013, 11:41 am

can i ask a
what is working rat free for now?

sophie.hacker - July 23, 2013, 11:55 am

On Skype now Biotech -thanks for your kindness thus far

biotech - July 23, 2013, 12:06 pm

(Jul 23, 2013 11:41 AM)SWEET_GIRL Wrote: [CITE](#) can i ask a

Darkcomet is free?. Search hackforums for a download link :)

inaveed - August 1, 2013, 7:11 am

This post is very useful.. I have set up my DC 4 d first time nw looking for a binder

hackgod1017 - November 10, 2013, 12:49 pm

Are you still available? I added you on your last skype, mine is sosasquad1 Thank you

Sweetie - November 10, 2013, 12:54 pm

Very nice tutorial! If any one needs help with port forwarding on a Belkin router, I can help you out.

expectjohnsmith - November 10, 2013, 3:42 pm

Nice Tutorial man! Bookmarked it and really helped!

OG 1337 - November 10, 2013, 5:03 pm

Nice tutorial! Helped me alot (Im new to this kind of thing guys :3)

biotech - November 15, 2013, 2:40 am

Sorry for late replies thank you I am glad it helped :)

praetorian70 - November 16, 2013, 5:00 pm

Nice tutorial, thank you for sharing

Sagezu - November 17, 2013, 1:40 am

Why doesn't my default gateway open when i type it on my url bar?

biotech - November 17, 2013, 7:29 am

I don't know I cannot see your problem. If you would like help add me on skype.

uznajabeen - May 20, 2014, 1:17 am

hi there mate!

i like your tutorial but i need you to help me out setting up this dark comment on skype.

i can pay you some bucks too.

can you help me please. just PM me your skype name.

i am waiting for you.

(Nov 17, 2013 08:29 AM)biotech Wrote: [\[CITE\]](#) I don't know I cannot see your problem. If you would like help add me on skype.

friend.

i can support you by giving you donations.

i am a new person but i have some money, which i can pay you if you help me learn.

can you please tell me your skype name.

or just add me on skype "thebadgroup"

biotech - May 20, 2014, 2:48 am

I don't need money but I will help you :)

Mr.Motivation - May 20, 2014, 10:00 am

i need help with setting RAT i have tried all things and used many tutorials like yours but now in this case i do everything like your tutorial says and my darkcomet is able to listen port which i forwarded with utorrent cause im not able to do it from my modem and i tested my server with my laptop and sandboxie after that nothing comes up in darkcomet so im not sure whats wrong so could some1 pls help me :/

comandoclone - May 20, 2014, 11:31 am

very good success congratulation to you !!!

Persians - June 30, 2015, 12:29 pm

Do you have to port forward 1604? Or anything other than that because I want to port forward a vpn and all the ports under 2048 are reserved.

Vanoxx - June 30, 2015, 7:15 pm

This helped me to port forward thanks bro!!!!!!

Merciful - June 30, 2015, 8:22 pm

I know I'm new to the site, But I can't keep my slaves. They just disappear after a few mins. Could you help me?

If you use that on your girlfriends laptop her antivirus will simply delete it, as Darkcomet is outdated (Even when crypted)?

belagio - February 7, 2017, 10:45 am

(Feb 7, 2017 01:36 AM)JaGLY Wrote: [\[CITE\]](#) If you use that on your girlfriends laptop her antivirus will simply delete it, as Darkcomet is outdated (Even when crypted)?

I didn't do it yet .. I'm just researching yet and to make it faster maybe you can give me some answer or advice ?

I actually have here Laptop, I just reinstalled a fresh windows 7 so that could make it easier to do that ..

So for me it's important first IF HERE laptop will be safe ? if I install (maybe with your advice) new or updated and mostly SAFE version of Darkcomet ..?? (I don't want to download a bad virus)

If you willing to help can you please pm me your Skype so I can do that faster.

Thanks in advance, I appreciate that ?

Mr CMD - *June 6, 2017, 1:04 pm*

Can anyone help me portforwarding?
