Vouches from eBay Ebook

The method shows you how to list the items you'll be selling and the technique to doing so. It's probably so cheap because many people are aware that this method is being used on eBay, but he explains how to actually use it properly, since it's kind of hard to figure out. You probably can probably make \$1000 over night, but it probably take you a while to get to that point. Making a few hundred in the first week is reasonable though.

Overall, it's a good guide and I'd recommend it to anyone looking to make some quick cash.
