His Sales thread:

His Profile Link: <https://hackforums.net/member.php?action=profile&uid=1175995>

So I bought this kids method a while back now and realized he sold me a public fucking method. not only that but he said he was going to help me set the whole thing up but instead he tried to insult me. this idiot is LQ and a danger to the marketplace community. I would advice in taking caution when dealing with this user.

The Payment Proof:

So then a while after I lookup his old sales thread and find this out:

To prove I'm not bullshitting [here is a link](#) to the post above.

So not only have I financially lost \$15 but he has possibly tricked other users who may of fallen for this crook. I would advise as said before to research on his products before you buy them because he may be selling an existing method that is already public..

This is sick and morally wrong for users to take it upon themselves to make an idiot out of users by making them think they are buying a legit method just to find out its another "Public" method. this is why you don't trust anyone.

As I cannot chargeback because it was sent as a gift I am lost with a hole in my wallet and the feeling that I have been fucked over once more by a HF cheat.. that's not a good feeling.

Proof I can't chargeback:

After a while our skype convo (seems crazy but I was happy he was being unprofessional):

As seen in the above post he "recorded" the convo. what could he possibly be recording our

conversation for? this kid seems really fucking sketchy to me. any way I just wanted to point this kid out for the crook he is and like I said. don't be fooled by him. and Also this method doesn't work either!

UPDATE: Opened a Claim by calling PayPal up. hope this goes well.

UPDATE 2: He closed his thread and said his business partner was scamming:

Covering himself up how pathetic. weird considering if it was his partner why is he upset over me charging back?

When it comes to Exposing assholes there's no better feeling then exposing them publicly as the crooks they are.

Really dude? You have to scam? I was a reg. member 1 year ago and got scammed three times on gamertags. Stop scamming!!!!

**9GAG** - December 14, 2012, 7:16 pm
