Thread: [Hi I have problme with my Chronic Crypter...](#)

roni2228 - December 15, 2012, 3:49 pm

Hi, I built virus with Darkcomet and I did Crypt with Chronic crypter that I bought today and only 1 AV found virus on the file:

[ESET]

2012-12-15 MSIL/Injector.AVH

I thought that it FUD

What did I wrong?

T?ny - December 15, 2012, 3:50 pm

please tell me you didnt scan it with virustotal..

roni2228 - December 15, 2012, 3:53 pm

No, I did scan with this site:

<http://virusscan.jotti.org/en>

Why?

You should have read the big long paragraph at the bottom lol.

It states that files uploaded through there are distrubuted. Meaning now that you just ruined the FUD. ?

Don't scan on Jotti either. They both distribute samples to the antivirus companies, which gets your servers detected. Use the built in scanner that comes with Chronic, or use novirusthanks.

If you scan with Jotti or VirusTotal, it distributes a sample of the file to the antivirus companies. Now everyone that has Chronic Crypter isn't getting FUD results.

You sent a virus to companies that get paid to detect viruses

Turtle™ - December 15, 2012, 4:03 pm

you fool! You have ruined the crypter for everyone that has it at the moment! When you upload a file there, they send a copy to the antivirus companies who analyze it and make it detected on their antiviruses! You really screwed up! You did everything wrong!
