Thanks, I appreciate it.

And yes I've contacted him.

It isn't bad. Nice find.
Anyway, I think that this isn't a challenge, he just wanted to share this.

Thanks.

Also your right, it isn't really a challenge considering the vector is so simple and the site itself is tiny, it would only take 1 or 2 minutes to find it.

There's more xss within the site itself.

Yeah I've seen.

The Down Or Not box has a non-persistent in it, and i'm sure there are tonnes more POST ones.

Thanks, I guess until this is fixed people will take it as a challenge.

If you'd even call it that ?

I found this few months ago, not worth to report it.

Pretty easy...
