How To Make Money RAT'ing

Ok welcome to my third tutorial! I can honestly say I have had positive feedback!

In this guide which will not be long at all I will be teaching you how to make a little bit of money off your slaves!

If you followed my previous tutorials, you should be setup and spreading by now!.

Part 1: Your first slave! And Basic Money Making!

Well you got your first slave! Feels great don't it!

Well now you have them there are many features you can use to mess with them. I don't bother playing with them I like just uploading to them etc.

So out of all the things I done when I started, I sold user accounts and passwords.

This is rather easy to do and depending on the account can make a few dollars.

Accounts that people will purchase off you vary from person to person but each have their own price. In my opinion the ones that make me the most cash are:

1. Brazzers
2. Guild Wars 2
3. GOG
4. Runescape
5. Minecraft

Step 1: So lets get started with your slave double click him/her

Step 2: Double click Password/Data

Step 3: Double click Stored Password

Now you have done that click refresh! Then you should see the RAT upload a dll file to get stored passwords!.

Once it is complete you should see the password list! I like to export and keep it but it is your preference.

There you go I now have 1 account to sell!.

Part 2: Making Money With Bitcoins!

Ok well I will give a common method of money making which is bitcoining!.

For more information on it visit:

<http://en.wikipedia.org/wiki/Bitcoin>

<http://www.bitclockers.com/>

We will start with a bitcoin mining! I use Chrome Miner, it will create a program that will allow you to upload and mine bitcoins!.

Their site gives you a tutorial of how to setup along with everything else.

I cannot show you how it works due to their site being down currently and I cannot login!.

So I purchased Cheap Miner for \$1 which by the way seems to work ok till you crypt it then it is not so good.

Step 1: First thing is first we need to make a miner.

Step 2: You open your RAT and hit ctrl + a to select them all, then right click

Step 3: Find your file it created and upload away!

Step 4: Now it is done go check your bitclockers account and see how everything is going!

That's it for this tutorial I hope you enjoyed it and I will be revamping some of my other ones with some new methods so please keep reading!.

If you want to see any more or specific tutorials please just let me know!

RainingDown - December 21, 2012, 5:43 am

Great tutorial and good thing with the Bitcoin Mining. May I ask how much can I make with like 10-20 slaves with the miner on them? And how would 1 bitcoin convert to \$?

biotech - December 21, 2012, 6:00 am

I usually go on <http://bitcoincharts.com/markets/> and I couldn't tell you how much you would get off 10-20 slaves it varies for every one :).

CheGuevara? - December 21, 2012, 8:29 am

Great tutorial mi amigo. Vouch for biotech ;*

Biotech delivers as always. KEEP IT UP MY BROTHA! <3

cientes - December 21, 2012, 12:46 pm

Good Tutorial! Good for members that already have their Setup and slaves. Happy Mining Everyone!

Poojar102 - December 21, 2012, 12:56 pm

Very nice tutorial mate.

By the way, it's spelt: RuneScape* ;)

biotech - December 21, 2012, 12:57 pm

Oh haha yeh I overlooked alot of spelling I am trying to push a new version of my spoofer out with a file binder thanks for letting me know ;)

Gilesfun - December 21, 2012, 1:15 pm

What rat do you use? never tried this so I dont have any slaves

AmazedMoron - December 21, 2012, 1:19 pm

(Dec 21, 2012 02:15 PM)Gilesfun Wrote: [\[CITE\]](#) What rat do you use? never tried this so I dont have any slaves

I would recommend Dark Comet as it is stable when it comes to free RAT clients :-)

?unx - December 21, 2012, 1:21 pm

You'll need at least 1k connections to make profit with bitcoin mining.

QAZ??x - December 21, 2012, 1:23 pm

It's a solid guide, though most know of this. Still, thanks for the share.

biotech - December 21, 2012, 2:06 pm

Alot know this your right but for the ones that don't they do now.

Dark comet is the best rat IMO for new people once you get more advanced consider purchasing one or stick with dark comet .

As for 1000 slaves you don't need that as a minimum that's if you want to whore it all.

I am glad you enjoyed the tutorials though.

cientes - December 21, 2012, 2:51 pm

What are some good Miners right off the top of your head, for BC mining?

biotech - December 21, 2012, 3:01 pm

I prefer chrome miner but there are many out there :)

Sm0keyFax - December 21, 2012, 5:24 pm

Looks nice bro.. Good thread for everyone

mr.worldw1de - January 2, 2013, 10:10 am

looks great!

what version of darcomet do you use ? i have darkcomet531 but it says "DarkCometRat connection

is secure with a password , if remote Computers dont use this password they wont connect"

biotech - January 2, 2013, 10:41 am

I use the same version and I don't password the server :)

Clark Kent™ - January 2, 2013, 1:39 pm

Sweet job thanks for this tutorial :)

biotech - January 3, 2013, 2:42 am

Glad you enjoyed it if you need help just ask away :)

Anotherone - April 19, 2013, 9:32 am

Didn't ever think of that and probably I won't use it. But still a nice and detailed tutorial :) i enjoyed reading it! Thanks!

bloodrise - April 19, 2013, 9:51 am

Very nice tut man!

now i can use it on school it works!

tvoyamat - April 29, 2013, 11:12 pm

bitcoin mining is the future !!!

thanks for ur tut

Darkjosh - April 30, 2013, 8:19 am

Great tutorial amigo A ++++

cheeers

xk3nvelOx - April 30, 2013, 9:13 am

Easy downloadable PDF's ! Thnaks mate ! Appreciate the wrk :)

Jafooly - April 30, 2013, 5:36 pm

This look really interesting, imma try it when i've spread some shit.

dzsipokink - October 8, 2013, 12:35 pm

thanks nice guide :) finally a good way for miner spreading :D

DaveKinect - October 8, 2013, 12:43 pm

Thanks for those suggestions i will execute them and try them myself !

Tirus - October 8, 2013, 10:15 pm

Putting your slaves to work on bitcoin mining is a good ole classic.

Although you will need more then 4 slaves to get any real profit

Cyprella - October 8, 2013, 10:19 pm

Great tutorial!!! The methods work perfectly but how do you sell these account? e.g LoL account. I have been to some account selling sites and what is the chance of the first owner just recovering the account?

biotech - October 31, 2013, 10:46 am

Hah sorry i haven't been keeping tabs on my thread to much. There are various sites and places to

sell the, I don't know if you can sell them here anymore.

L412 - November 24, 2013, 4:56 am

Awesome ! Thank's for sharing man ;)

BenCardson - November 24, 2013, 6:23 am

Very nice tutorial, I bookmarked this just in case. Thank you very much.

jonagold1 - November 24, 2013, 10:12 am

thyanks mate, a Very nice tutorial mate.

biotech - November 24, 2013, 10:39 am

Glad you all liked it if you need any help, please feel free to ask.

Squishedlemons - November 24, 2013, 1:34 pm

nice tutorial man i will really try this

enVySicK - November 24, 2013, 1:40 pm

i enjoyed reading it! Thanks tut im just starting

drzeta - May 25, 2014, 2:02 pm

Good methods ...

thanks 4 sharing

biotech - May 25, 2014, 2:17 pm

Glad you enjoyed it :) if you would like anymore I will be happy to make them :)

humet111 - May 25, 2014, 2:42 pm

Great tutorial thanks man

Holt - May 26, 2014, 1:05 pm

Thanks for the great tut, bookmarked :)

JethroHeep - June 5, 2017, 4:06 am

Thanks for the idea. Will try these as soon as possible

jak-ey - June 5, 2017, 5:38 am

Thanks will check this for sure
