Hit me up with a pm. i might help you.

Coffee - December 21, 2012, 9:27 am

PM me, I can also help out with this if needed

Frozen Ezreal - December 21, 2012, 10:32 am

Web design is fairly simple you shouldnt need a mentor.

I started by learning HTML at w3schools, just mess around with it until you start to understand what happens when

NightFury - December 21, 2012, 4:05 pm

thanks! i dont have an experience in basic HTML, CSS and javascript. also about how to configure databases (Apache/MySQL/PHP) i tried making a joomla website on a free webhosting, intalled it via app of cPanel automatically configured the SQL database and since joomla is gui, i manage to change some info in the website

Frozen Ezreal - December 21, 2012, 4:08 pm

Ignore SQL, PHP and Javascript until you fully understand how HTML works and how to do basic CSS.
