MLV CRYPTER

Hello HF,

I posted this thread yesterday and this is a repost.

In my last post, there was no stub in my crypter so it's not good.

I included a stub for you!

Features:

- Crypter

Please read the readme in the folder of the crypter.

Here is a picture of the folder.

[img]<http://s14.directupload.net/images/121222/t2s39vt4.jpg>[/img]

And here is a picture of the crypter.

[img]<http://s14.directupload.net/images/121222/urnip4n6.jpg>[/img]

I hope you like my crypter and please let a feedback here.

Download: <http://www.mediafire.com/?9udhqf2c124curr>

Virustotal:

<https://www.virustotal.com/file/9f00f4eccec37c828226090b591dcf29d22b572a92a75b25de1f8ddf86040603/analysis/1356178144/>

WTF? It shocked m 7/46.

Please don't say, that I just want to infect you. I don't want to.

Maybe it's because of the stub.

I don't want to infect people. Ok ? ?

Enjoy ?

Leroy Jethro Gibbs - December 22, 2012, 2:17 pm

I don't understand where the file goes. So no good sir. xD But McAfee didn't pick it up. If the program had an output option then i would vouch for it. But until that gets fixed. No good. xD Sorry :/

MrLeichtVideo - December 22, 2012, 2:38 pm

It updates your file, you can test it by uploading on virustotal.

WindyWindz - January 31, 2013, 5:56 am

Complete failure.

Doesn't work.

Probably backdoored.

Why on earth would you scan on VirusTotal?

Good luck on hacking if you scan with VT.

etsoberano - January 31, 2013, 8:54 am

One big suggestion, if its a crypter NEVER upload to VT it will get UNFUD very quickly, instead upload to elementscanner.

DEVIL X - January 31, 2013, 9:13 am

It seems to be a virus more than the crypter...

also it will be unFUD in no time as he already uploaded it to VT... ?

m3wbie - February 1, 2013, 6:28 am

Thnks bro, can you make updates for FUD 100% ?

After executing the exe, i watched on CMD on netstat -n that a new port was open (1604) its darkcomet. His trojan is FUD. FU !
