Thread: [in4.us - Image Hosting, Direct Image Linking, and URL Shortener with API!](#)

Zoidberg - December 22, 2012, 8:01 pm

[\[img\]http://in4.us/bA\[/img\]](#)

My image url is <http://in4.us/bA> . If you visit it, it will show you the image, this would be a direct link, and is used for embedding. You can also give someone a page with the image inside a frame, used for IM's and whatnot <http://in4.us/bA&f>

All is done with PHP and SQL, I might release the code sometime, but I haven't checked well for vulns with the upload and whatnot

If anyone could test it, that would be nice

someone here has already made an amazing image upload site.
minus.com is my favorite :)

minus.com is my favorite :)

Minus only goes on to advertise, and 'minus' is his username
