sp3ctrum - December 23, 2012, 12:56 am

Hello HF's ?

Well Its about 3 am here, really bored and had a long day. So I just put together this little page for beginners that want to learn website hacking and security. It links them to all the great TUT's here on HF's that deal with SQLI, XSS, LFI, RFI & some essential tools as well as browsing sites for when they arent learning. Its nothing to special, its simple, not fancy at all but I just put this together to burn time. Maybe some people will find it useful, but I will be updating it when more great TUT's come along so people can keep learning. Mostly its for people who want to get some of the basics down. Well feel free to check it out and if you like set it as your firefox start page. Thats what I made it for but heres the link. Enjoy ?

Yea I though the same.. I figured since im going to still add on I would have to make it smaller. But I guess I can enlarge it a little more. Thanks for advice :3

I was quite surprised when I seen this, it's actually quite well put together. If you work on this some more it could turn out to be quite useful.

sp3ctrum - December 23, 2012, 3:25 am

Thanks everyone for the comments & support :3 I was just trying to bring something new to HF's and be a bit more creative. Apparently this will be a bit bigger than I thought lol Or well at least I hope :>

Alright mate, fixed them :3 Thanks for the heads up!

Frododo - December 23, 2012, 3:58 am

Thanks alot for this!

I will definitely check this out, if I deface any pages with it, you will be on it if you want xD :3

Well this should help you overall. But besides looking at these tuts I would look at some programming languages also such as php, sql, html, & javascript. Thanks for the offer though, but I wouldnt want to be on your deface, thats your work not mine. I just built this, you should be thanking the other HQ members who provided the TUTs mate ?

Noah™ - December 23, 2012, 2:59 pm

looks fucking awesome would you mind if I got the source for that page? feel free to add in credits to you and your site in the footer but that looks pretty sick.

Thanks for editing!

If you ever need help on your website ring a bell :).

Greetings InQontroll.

5NiP3R - December 23, 2012, 3:08 pm

Well it's alright, I mean it's nice to have all the threads in one place and all but this can easily be created using any CMS like wordpress., anyway, thanks for taking the time.

sp3ctrum - December 23, 2012, 8:50 pm

?Slender : Sent you the code. Hopefully I get something in return :3

InQontroll : No problem mate, Thanks for informing me and thanks for the offer, will keep it in mind.

5NiP3R: Yea I could have but I just dont like the idea, it makes everything way to easy. Why not put a little more time into something, you will cherish it more and have more respect for it :>

Thank you for this. It was very useful

v3xr - March 6, 2013, 2:32 pm

Awesome site bro! A great beginner resource, definitely!

Might check out my tutorial on CRLF header field injection, could be useful to some beginners too
:P I don't think there's enough emphasis on header injection these days hahah.

sp3ctrum - March 6, 2013, 2:34 pm

@lchi: This is really old, I dont know how you never came across it xD

@v3xr: Thanks mate, and agreed! Never see anything anymore about CRLF & header injections :<

Niggas got to keep in touch with their hoes someway. Could be reading up on SQLi and get a
message on your phone, "wanna fuck, Im * add me on FB". Quick access. I just added random shit
on it. I was bored.

Team Digi7al, is that group really still active? ._.

Ironpunch - March 11, 2013, 9:01 am

probably add more advanced things, really a better and a very good project, add BOF's and RE's there, it would be an ultimate project as I can see it growing ! add more onto SQLi, there are much more. Just dig all out.

david6 - March 11, 2013, 10:44 am

Very nice graphics :p Vouch for this!

Th3PonyWizard - March 11, 2013, 11:07 am

Was at Digi7al ages ago, was quite a decent group at that time.
Site is cute.
