(Apr 26, 2013 09:47 AM)??Dong??? Wrote: [\[CITE\]](#) Update on this amazing spreader!: I have had this spreader for about a week now and have already stated how great it looks and responds. But I must admit, I had a few problems with it in action and wasn't sure if I was setting it up correctly or not. I just contacted the OP, who helped me out so damn much. Even though he is busy with his exams right now, he took the time out to give me a full demo and explanation over TV. I can honestly say that I have NEVER experienced better customer service than this. It's well worth the price alone knowing that this OP really cares about his customers and not just the money. That says a lot! He not only showed me everything working correctly, he gave me plenty of advice as well and I really appreciate that.

For anyone who is thinking of buying this, buy it! All the spreading options work flawlessly, as I've just witnessed for myself and was smiling like crazy in the process..funny, smart and caring guy. Proud of his products, as he should be. He knows they work and so do I. Buy this guy's products! Can't rate highly enough! And yes, I am a genuine, paying customer and not a mate of his, although I will be from now on after this service.

(Jan 21, 2013 08:35 AM)Slurping Wrote: [\[CITE\]](#) I have found this product to be a lot of fun and potentially profitable, used correctly. I just wish thmaster100 would quit college and stop letting his future get in the way of development of this spreader.

If I were to type a review, it would have to be all positive. Any negatives would relate to the fact that I can't get certain cryptors to work with it, but the beauty is *they don't have to*. Well, usually.

I changed PCs the other day and lost access to a few of the hardware-locked apps like JY and it took one PM and a matter of minutes before he had resolved the issue.

Thanks again thmaster100, if I could rep I would, but I can vouch. And when a product is worth it, I do.

I have found this product to be a lot of fun and potentially profitable, used correctly. I just wish thmaster100 would quit college and stop letting his future get in the way of development of this spreader.

If I were to type a review, it would have to be all positive. Any negatives would relate to the fact that I can't get certain cryptors to work with it, but the beauty is *they don't have to*. Well, usually.

I changed PCs the other day and lost access to a few of the hardware-locked apps like JY and it took one PM and a matter of minutes before he had resolved the issue.

Thanks again thmaster100, if I could rep I would, but I can vouch. And when a product is worth it, I do.

I bought this today and I'm giving it a test run at the moment. But so far, I am very, very impressed. I have wasted so much money and time on worms and spreaders that are outdated and do not work, so this is a pleasant surprise. I spent some time on Skype with the OP and I must say, the customer service this guy offers is worth the price alone. I can honestly say that I have never experienced a

seller that is so friendly, easy to get along with and so helpful as this guy is. I know for a fact that I can PM him with any issues and he will give me a sensible and practical reply. What more could you want? Why isn't this OP Ub3r yet? Seriously! HQ guy and a HQ product (thankfully!) I have been involved in the hacking scene for over 20 years now and I do not hesitate to recommend this product to anyone! Very well done OP! Have some green for your hard work :)

Update on this amazing spreader!: I have had this spreader for about a week now and have already stated how great it looks and responds. But I must admit, I had a few problems with it in action and wasn't sure if I was setting it up correctly or not. I just contacted the OP, who helped me out so damn much. Even though he is busy with his exams right now, he took the time out to give me a full demo and explanation over TV. I can honestly say that I have NEVER experienced better customer service than this. It's well worth the price alone knowing that this OP really cares about his customers and not just the money. That says a lot! He not only showed me everything working correctly, he gave me plenty of advice as well and I really appreciate that.

For anyone who is thinking of buying this, buy it! All the spreading options work flawlessly, as I've just witnessed for myself and was smiling like crazy in the process..funny, smart and caring guy. Proud of his products, as he should be. He knows they work and so do I. Buy this guy's products! Can't rate highly enough! And yes, I am a genuine, paying customer and not a mate of his, although I will be from now on after this service.

Hi,

I am really interested in this product but I am new to all this so I have a few questions.
It is the new members that find it hard to spread. I see the videos but I still don't understand the points below:

What does the victim need to do when they receive the "test message" to become a slave?
Does the spreader then move on to their friends lists?

Thanks for any answers forthcoming!

This looks a good worm.

Btw, whats the purpose of exe injection ? And can it inject in any file ?

I mean does it inject our code in exe files and when they open the injected file, they are infected ?

I would be obliged if you can answer these questions.

Thanks and Regards
~ The Warrior ?

Hi ,

if you talking about Skype & yahoo , then yes all of them once

if you meaning Facebook it will be one by one only currently chatting :p

proTWiiZ - July 28, 2013, 11:06 pm

I will probably get this soon, looks good :)

ipixelatedx - July 29, 2013, 7:11 am

"No dependencies" ? So I could run this on Ubuntu?

Hack1 - July 30, 2013, 11:48 am

I see by your demo that the Exe Injection , will Inject all the Exes on that pc, can you think what will that do to that pc if your file get dedacted by AV??

yes , not all EXE just the one not about the system

all files get deleted :p

I was impressed by the "sality" worm even it's old one but effective :p

Lycoso - July 30, 2013, 4:24 pm

Looks like a Real Pro. Will consider buying this near future.

the lan spread is not like exploit , it's Spreading in shared Drives or Folders

wont be Victim until the one in other pc runs the file in those places

What's the RAR spreading? Does it just the file into the archive or does it hide it in there? (Would like to use it for torrent spreading)

And the .exe injection what does it change to the host file, are the tabs in "properties" changed from the original?

Thanks

rar spreading : it will add it self to most of all rar files in the infected pc

exe spreading : it will inject (bind) it self to most of all exe files (not system files)

anything else I am here .

Zenka1992 - December 2, 2013, 12:15 pm

Let's say the spreader injects it self to every exe. So whenever user uses any of exe in his PC, the bot will be launched again and again, and will bind itself to every exe once more every time an exe is launched? Or the spreader maybe remembers that it was already launched on this system and won't launch again?

?Døpe - December 2, 2013, 5:52 pm

you ever heard about mutex? lol o.o

its just if the slave drags the file to an usb stick and give it to a friend or upload it or what ever its with virus :)

Btw need HWID reset i emailed you ;)

your RAT will fix the executing times with mutex:p

Fixed mate , I was sleeping :D

enjoy the new copy if there is any problems just pm me like always

Zenka1992 - December 2, 2013, 11:04 pm

Well I'm not spreading a RAT, I have something else, and I it wouldbe not very good if it will be executed many times. That's why I'm asking.

Hi ,

1 - the HWID you provided in the Payment was not the same you sent in email (I use email to find user & activate)

2 - look like our times not same so excuse me for that

already explained to you in your last email this

good luck

Hi

New Stub got released

1.0.2

Fixed bugs

Fixed Spreading Error

Improved the encryption of data (downloader , spreading links ect)

bikezone - February 2, 2014, 1:18 am

im interested it seems good spreading.

Riply - February 7, 2014, 7:25 am

is it fud, does it need a crypter, what are the virus scan results? if its fud im interested

PS any spreading results would be awesome, daly average or something it its possible, thx

Seems like a nice spreader but price is a bit too high in my eyes

thmaster100 - February 8, 2014, 12:29 am
Hi guys

first time I posted this most users asked for videos I posted all videos I can do, when some customers thought it does not work after they didn't know how
I had to go for like 30 on TV to show them & just check the last pages & read :)

if anyone needs anything just use the support or PM me that's it :)

good luck

Hello dude,
It's an old thread so I have two questions :

- 1) Is it still working and up to date for all spreading options ?
- 2) Is it supporting .net like plasma rat or http ?
