BIOTECH'S FILE SPOOFER AND FILE BINDER

Old thread with just the spoofer:

Spoiler [\(Click to View\)](#)???[FREE]Biotech's Extension Spoofer [Direct Link] ???

<https://hackforums.net/showthread.php?tid=3110389>

I have discontinued my old thread to reopen a new one which will be for this new application and updates permanently. The old spoofer is still available and always will be just in case you don't want the extra features.

I aimed at getting this released before Christmas so the file binder needs more testing then what I have dedicated too it.

I will be restyling all of it after Christmas and adding a icon changer.

Credits go to Vamprrr for his tutorial as I wouldn't have been able to code it.

I have gone on his tutorial and optimised his coding but I made it compatible with his stub so every one has the benefit of making it fud them selves. [Click Here](#) to visit the tutorial

The stub registers as a false positive but if you are in doubt please use the tutorial and compile your own just make sure this is the same Const FileSplit = "77150"

If you enjoy this application please say thank you!

Features

-Spoofer

- 1) Spoof with any extension you like.
- 2) Spoof reverse the file extension only.

-File Binder

- 1) Bind any 2 files together.
- 2) Create your own stub.

Requirements

Microsoft .net Framework which is available here: <http://www.microsoft.com/net>

Builds

23/12/2012 - release - Spoofer v1.0.3 - Binder v1.0.0

Any idea on how I would go about re-fudding the stub? I'd really like to understand the concept behind it. I've also looked at the said tutorial.
