Thread: [\[Preview\] Final version, full GDI+ listbox with scroll](#)

Tedd - December 24, 2012, 7:41 pm

Old:

Spoiler ([Click to View](#)) So a few days ago I posted a preview of a completely GDI+ listbox with scrollbar..

I decided to remove the scrollbar for the listbox (although I will release a completely GDI+ scrollbar later)

and went with a more iPhone/Windows8 type approach.

Again:

This is JUST A PREVIEW with a MINIMAL FRAME TO SHOW FUNCTIONALITY and NOT A FINAL PRODUCT

So that means with the help of Recuperare, I will be themeing this an release it shortly.

Preview:

New:

This is the final version, I will release this new version later today, along with the recoded SkyDark theme.

Sweet, Good stuff from you like always :)

Albert - December 24, 2012, 7:44 pm

That looks really sexy, Awesome Job.

Good Luck with the upcoming updates.

Anon?M ID - December 24, 2012, 8:02 pm

looking sexy.

i cant wait for the release :P

good luck with your work :)

Looks awesome. One with a scrollbar would have been cool, but this is even more awesome.

Release it quick before Apple sues you, rofl!

Lol, I'm already thinking of what apple would say :p

"Dear Tedd at Hackforums,
We're suing you for \$100.000, for the fact that your listbox animates back when you drag it outside the actual item.

We wish you the best of luck (not that you have any chance of winning),
-Apple's undefeatable lawyer"

Blink - December 25, 2012, 5:11 am

Nice, the animation looks very smooth.

But I think this kind of interacting for scrolling works better on a touchscreen then on a pc with a mouse. :P

ident - December 25, 2012, 6:31 am

Great another picture. Whats your next trick?

DotNetNut - December 25, 2012, 7:11 am

Really nice work man, i can tell you spent quit a bit of time on this :D

Also Ident whats your next trick... Oh wait you stopped at Linq.. HAHAHAHHAAAAHA.... Seriously Linq is NOT hard bro... grow the fuck up.

Tedd - December 27, 2012, 10:41 am

Alright just finished the design. Will release later today

?Mephobia - December 27, 2012, 10:47 am

Very cool tedd. Nice job! Gotta figure out how u did dis shit.

Bird Is The Word - December 27, 2012, 10:56 am

Awesome work Tedd. :D

Looks sick, great job tedd, I look forward to seeing more by you.

xSilent - December 27, 2012, 12:00 pm

Nice job.

Let's see what ident has to say now.

Right? Hahaha

Dark_Noodles - December 27, 2012, 12:54 pm

Impressive work.

Let's see how many people would use it and not give credits.

soviet87 - December 27, 2012, 12:55 pm

Very nice work as usual Tedd. Can't wait to play with it!

Delegate - December 27, 2012, 12:57 pm

Looks fucking amazing Tedd, cannot wait to get it.

The Dr - December 27, 2012, 1:03 pm

Wow. That looks beautiful!! I tried something similar once, was a complete disaster, lol.

Well, I'd like to see people give me credit for my work, but I don't expect it. If people use this code on the forum I think people would notice, but honestly that's what it's for. I want people to be able to make better themes, build from my ideas and aspire.

Haha yea this took a while. You start slowly. It's a combination of everything I have learned to date :)

mullinupp - December 30, 2012, 5:41 pm

Really amazing Tedd i would love to see this one closer up ^_^

Percocet - December 30, 2012, 8:01 pm

I think the items are a little bit big, but other than that it looks nice!

I did that to show basic functionality, but there is actually a property for item size, and item spacing. That way it is totally up to whatever the user thinks is fit for their application :)

soviet87 - December 30, 2012, 8:16 pm

Any ETA in this Tedd? It looks amazing, must...play...with...it!

Then you have a really good control. :)

Great job Tedd.

BloodGenio - December 30, 2012, 8:18 pm

Thanks Tedd, wasn't trying to hound you. You just have me really excited about this release, sooo much better than that poopy listbox MS includes.
