Thread: [\[Tutorial\]](#) [\[Support\]](#) [\[Free Setup\]](#) [How to setup and use DDoSeR 3.4 with auto crack](#)

Green™ - March 13, 2010, 12:17 pm

Disclaimer: This tutorial is for educational purposes only. If you use this tutorial for malicious purposes its on you.

(This only works with Windows Operating Systems.) In this tutorial I will show you how to use DDoSeR 3.4 . You will need a few things that are included in the requirements section of this tutorial. If you do not get a certain part of this tutorial, need help, Or are an HF 1337 or Uber and want me to do this for you i can be contacted either by MSN or AIM.

My MSN is itz_bluntman@fbi.gov

My AIM is ItZBIUnTMaN420

Use proper grammar and spelling when you are talking to me.

Requirements: All the programs you need i have put in one .zip . You can get that [here](#)
If you have Windows Vista follow [this](#) tutorial to turn off your UAC. For windows 7 you do the same thing, Except you slide the bar all the way down.

Step 1: Make a no-ip account. To do that go [here](#)

Step 2: After you register an account sign in, Then click on Add a Host. (Note if your not at this screen go [Here](#))

[\[IMG\]http://img696.imageshack.us/img696/4531/65695862.jpg\[/IMG\]](#)

Step 3: For the host name it can be anything but it has to be 3 characters and should end in no-ip.info . Just match the picture for everything else.

[\[IMG\]http://img190.imageshack.us/img190/4871/49896212.jpg\[/IMG\]](#)

Step 4: Use Simple Port Forward to forward port 3085. Follow the Getting Started instructions that appear on start up to set up the program.

[\[IMG\]http://img69.imageshack.us/img69/5432/77664292.jpg\[/IMG\]](#)

[u][b]Step 5: Open up the Auto-DDoSeR crack and click on check hosts. It should say "Host file unpatched!" .

[\[IMG\]http://img689.imageshack.us/img689/6474/pic1oy.jpg\[/IMG\]](#)

Step 6: Click on patch and an error should come up. Just click ok and re open DDoSer. Click Check Hosts again. It should say "Host files patched!"

[\[IMG\]http://img361.imageshack.us/img361/9192/pic2dk.jpg\[/IMG\]](#)

[\[IMG\]http://img28.imageshack.us/img28/3639/24185039.jpg\[/IMG\]](#)

Step 7: Click get DDoSer then enter your no-ip DNS where it says DNS: after your done with that click on Run. (Note: Do not close out the CMD window that pops up.)

[\[IMG\]http://img697.imageshack.us/img697/953/pic3al.jpg\[/IMG\]](#)

Step 8: Double click on DDoSeR3.4 . Put the same no-ip DNS that you put for the crack when prompt. Click ok when the random box of text appears.

[\[IMG\]http://img367.imageshack.us/img367/4739/pic4.jpg\[/IMG\]](#)

Step 9: Go to the settings tab and click download. You now have your bot. Test it out by running it in sandboxie. If it doesnt appear please use the troubleshooting guide below.

[\[IMG\]http://img705.imageshack.us/img705/9982/pic5xl.jpg\[/IMG\]](http://img705.imageshack.us/img705/9982/pic5xl.jpg)

Troubleshooting: If you still cant get it to work after reading the tutorial then use this guide to help you.

Step 1: Intsall the No-ip DUC. The setup files are in the pack.

Step 2 :Sign in using your no-ip account.

Step 3: make sure all the hosts are checked. If not check them as shown in the picture below.

[\[IMG\]http://img706.imageshack.us/img706/5994/59085707.jpg\[/IMG\]](http://img706.imageshack.us/img706/5994/59085707.jpg)

RooR ToKe - March 13, 2010, 12:27 pm

1st post, great tutorial i really enjoy you'r tutorials, Kepp It Up!

Cracked Overdrive - March 13, 2010, 12:28 pm

Impressive tutorial great job!!!

Green™ - March 13, 2010, 1:55 pm

Thanks, Can 1 of you guys confirm everything in the pack is clean?

Green™ - March 13, 2010, 1:56 pm

Thanks, Can 1 of you guys confirm everything in the pack is clean?

Recoveries - March 13, 2010, 7:07 pm

Nice tut dude. thanks

DONKEY_ONLINE - March 14, 2010, 3:02 pm

Great tut :) Plain and simple.

Deadpool™ - March 14, 2010, 5:08 pm

Thanks. Got mine working! Gotta love the cracks!!!

RidingSlow - March 14, 2010, 5:14 pm

Do we only have to do this once, or do we have to do this once everytime we want to run the bot?

Green™ - March 14, 2010, 5:26 pm

(Mar 14, 2010 05:14 PM)RidingSlow Wrote: [\[CITE\]](#) Do we only have to do this once, or do we have to do this once everytime we want to run the bot?

If by bot you mean booter then yes.

I will include that in the tutorial if it lets me edit it.

Thank you for reminding me.

215APHILLYATED - March 14, 2010, 5:29 pm

YOU ARE DAH MAN!!!

travis8_8 - March 14, 2010, 5:43 pm

Good guide, but I have a problem. When I open up DDoSer, type in my host and click okay, no random messagebox pops up, and I just get "Connecting to Database" on DDoSer... Any ideas? My host file is patched. Windows XP. Port is open. :S

Green™ - March 15, 2010, 1:28 pm

(Mar 14, 2010 05:43 PM)travis8_8 Wrote: [\[CITE\]](#) Good guide, but I have a problem. When I open up DDoSer, type in my host and click okay, no random messagebox pops up, and I just get "Connecting to Database" on DDoSer... Any ideas? My host file is patched. Windows XP. Port is open. :S

Contact me via AIM or MSN.

They are both in the beginning of the tutorial .

DenjerOpa - March 15, 2010, 2:13 pm

Got the same problem it keeps waiting at connecting to database

Green™ - March 15, 2010, 7:55 pm

If you have Windows 7 this crack will not work for you.
I just found out today.
If you do not have windows 7 please contact me via AIM or MSN.

Xhat - March 20, 2010, 2:14 am

Hi, pm me your msn please, i don't send pm =)

I have a problem, I'm under vista

HardWareGuru - March 20, 2010, 8:48 am

Worked.

LOVEEEEEEEEEEEEEEEEEEEEEEEEE

XACTLYSIN - March 20, 2010, 9:03 am

Good job, but this was posted before, Can u find a way to get DDoSeR 3.6

Sam Fisher - March 20, 2010, 9:07 am

Worked perfectly, thanks again for the TUT.

iKorkSkalle - March 20, 2010, 9:16 am

Thanks alot mate. :)

+Rep.

..MasterMind.. - March 20, 2010, 9:29 am

I remember me trying this earlier (was an other tut about this aswell) but didn't work. Does this work on 64 bit OSes aswell?

EDIT: I ran the auto crack, checked the hosts file then patched it. But when restarting the crack it still says the hosts file is unpatched.

Screw - March 20, 2010, 9:03 pm

my keeps sayin failed to load DNS what do i do?

DDoSKing - March 20, 2010, 9:04 pm

Hey if people install bots on ur cracked version.. it doesnt work mine doesnt?

Green™ - March 20, 2010, 9:37 pm

For anyone needing help, Please contact me via AIM or MSN.

DDoSKing - March 20, 2010, 9:58 pm

blunt answer my question on the top please

eXert - March 20, 2010, 10:05 pm

Legit tut dude thanks it was understandable haha

hina - March 25, 2010, 12:00 am

good tutorial .Where can i get DDOSER 3.4 with auto crack?

thanks again

just found out the file was already in the post thanks

Sobriety - March 25, 2010, 5:59 am

Cant get this to work :/

when I open ddoser and type in my no-ip it just gets stuck on "connecting to database"

cybr - March 25, 2010, 6:10 am

Looks good, ItZ_BIUnTMaN. I'll try this out now. :)

If you get a stuck "Connecting to Database" message, do this:

Open DDoSeR-AutoCrack.exe

Click Check

Enter your DNS

Click Run

You should be able to run DDoSeR 3.4 again.

CyberM@X - March 25, 2010, 6:51 am

I would like to try out your service please, I have added you on msn :)

Sobriety - March 25, 2010, 8:07 am

thanks a bunch theorium! worked.

can i close all the crack apps and cmd etc when it is open?

and will i have to repeat these steps everytime i open the app?

EDIT: It doesnt seem like the bot works, I dont get connections through

pyryoer - March 25, 2010, 10:03 am

This worked great! I was failing pretty hard with things like metus, this set me up quick and easy.
Thanks!

VA Tragedy - March 25, 2010, 11:58 am

yea bud its all clean! and i cant remember if you mentioned this but they will need to run the patch as an admin so it will work

Hey i have DDoSeR up and running but when can i close that cmd window please PM with the details!

great tut by the way!

hellstormx - March 25, 2010, 11:01 pm

Infected scanned it - dont download

<http://www.virustotal.com/analysis/66c2ae639a39d9443aef6426943029456b08f3bc55ff83a91b41a39403b16411-1269583144>

pyryoer - March 26, 2010, 5:59 am

Of course it's going to show up as infected, it's a ddos tool man.

bully - March 26, 2010, 6:43 am

First of all this works on windows 7

2. dont leech the autocrack give credits

Shottingham - March 26, 2010, 9:48 am

Hey all, i keep getting this error when running the client and inputting the DNS for the second time, i followed the guide exactly.. any help would really be appreciated, thanks..

really necessary to quote my whole tutorial?
What operating system do you have?

Vexy - May 3, 2010, 12:34 pm

I am on XP and there are a few problems. When I first checked hosts, the host file was patched. Also, after clicking Get DDoSeR then Run, I would get the CMD window, but nothing after that. :(

Diamond3x - May 4, 2010, 12:08 pm

I am on xp and it worked for me. Just 2 questions.

1. What is the latest version of ddoser out in public?

2. How does it patch the hosts file. How do I do it manually. Because I don't want to run the crack on my system.
EDIT.

Ok. I got them.

Just add these sites to your hosts file.

Any help. Thanks :)

Don't close DDoSeR-AutoCrack, Push "Run" and then open Ddoser 3.4 , enter your no-ip and it will connect to the database.

.Eli - May 11, 2010, 6:21 pm

Great tutorial, Love it :)

Now i just need some help spreading..

viper009 - May 12, 2010, 7:02 am

Finally a tut that worked for me.

Cheers alot mate ;)

PacketBeast - June 23, 2010, 2:45 pm

My own connection still does not pop up ffs... This happens on every booter that I have tried and I am 100% sure that I have portforwarded and everything correctly. PLOX HELP A NOOB IN NEED!

DreadIsHash1 - July 9, 2010, 8:00 am

nice tut, thanks alot it worked =]

Sex-Android - July 9, 2010, 8:18 am

We don't need to forward any port ?

getuliofmj - July 9, 2010, 4:20 pm

good tutorial
worked. =)

thx

~Chester~ - August 24, 2010, 11:40 am

whenever i go to test the bot, nothing shows up! wtf am i doin wrong?

moh_p87 - August 27, 2010, 5:45 pm

it still waiting connecting with database

KylelzPro - August 27, 2010, 5:53 pm

Try it on these ppl

76.125.114.55

64.219.130.162

:)

nature12 - August 27, 2010, 6:03 pm

I dont use No-ip though i use dyndns :d.

(Jul 9, 2010 04:20 PM)getuliofmj Wrote: [\[CITE\]](#) good tutorial worked. =)

thx

everyone who opened this is now infected. [virus scan](#)

Exha - October 18, 2010, 2:31 pm

Big thanks for this tutorial !

Gebove - November 5, 2010, 3:27 pm

EDIT: I figured out all my problems shortly after asking about them, however, I now have one last question:

If I rename the bot file, will it corrupt it? Or am I able to rename it without anything really changing to it? Or should I just leave it as "bot" and edit it's name and icon in Ownz Crypter? (I will be using v1.9.9)

Imurikauppias - November 7, 2010, 1:16 am

Can i ddos cs:s server with this? o.O

dave82296 - November 20, 2010, 7:06 pm

can u help i get a failed to verify dns error

FMF - November 21, 2010, 2:00 pm

THANKK YOU I FINALLY GOT IT TOO WORK AHAHAH thanks :)

??h™ - November 21, 2010, 7:16 pm

Thanks for the share. This is a good tutorial. ?

Obsequious - November 21, 2010, 11:30 pm

It's getting stuck on Connecting to Database. Any help is appreciated!

santoruis - November 22, 2010, 1:57 am

same here no1 explains why it keeps saying connecting to database.

Obsequious - November 22, 2010, 7:40 am

(Nov 22, 2010 02:57 AM)santoruis Wrote: [\[CITE\]](#) same here no1 explains why it keeps saying connecting to database.

I really need to know. ?

citg0 - November 26, 2010, 2:00 am

Everyone ive tested it its clean, but I have one problem, when I run it in sanboxie I get a error, is that good or bad?

Eshta - November 26, 2010, 4:00 am

you the best very nice TUT 10/10 realy

trevy2007 - November 26, 2010, 3:16 pm

When I run bot.exe it doesn't work... Any ideas?

Catlyfe - November 26, 2010, 8:08 pm

Can someone explain to me why it keeps saying "connecting to database." Add me on AIM please.

KCudii

trevy2007 - November 26, 2010, 9:22 pm

(Nov 26, 2010 09:08 PM)Catlyfe Wrote: [\[CITE\]](#) Can someone explain to me why it keeps saying "connecting to database." Add me on AIM please.

KCudii

Try pressing Check. When it says that it's patched, put in your domain and press Get or download, whatever it is, to download the files. After that, THEN run the DDoSer when it says that you can run it.

Hope I helped.

I still have my problem. My bots are not added to the table with all the zombies in it. Any ideas?

~Chester~ - January 19, 2011, 8:37 pm

not working for me, aim me plz when you have the chance to help me set it up if you could:AIM: CheaterTheHax

Chris.. - January 21, 2011, 4:52 am

it just gets stuck on connecting to database.

GSHonor - January 21, 2011, 9:31 am

when you download a bot, where is it located??

ihack4lyfe - January 23, 2011, 7:53 pm

very nice goodjob i think im starting to get the hang of this.

tooly - January 24, 2011, 12:14 pm

Thanks great tut
202022020202

kingkaos23 - January 24, 2011, 2:51 pm

good tut ill try this on my downtime.

Insetive - March 9, 2011, 6:08 pm

Nice post really helped me.

Coderain - March 9, 2011, 9:57 pm

Nice tut looks good keep it up

Wild_Illyrian - November 10, 2011, 7:34 am

Hey , i was able to run the doser but the bot doesnt seem to work and i made all the instructions in your tut :(pls pm me with smth i ahve 4 days trying to crack it and now cuf ekhting bot doesnt work :@

ticklemeneedler - November 10, 2011, 7:49 am

Nice tutorial but I think there is a newer cracked version of DDoSeR on the forums.

autorunman22 - November 10, 2011, 8:55 am

Hello OP, what is the latest crack for DDoSer? Is it 3.6? If so, which of the 3.2 and 3.6 is way better? Thanks!

Edit:3.6 not 3.2. LOL the message is too long im so retarded.

Edit:3.6 not 3.2. LOL the message is too long im so retarded.

Fluxable - January 21, 2012, 12:19 pm

I've port forward correctly,Made a 'DNS',Got DUC 3.0.But still when i run my bot in sanboxie it doesn't show up on my booter or when i just double click on it. Also i have my antivirus and firewall off.

Can someone please help me

zHarman - February 4, 2012, 6:36 am

I got my Ddoser 3.4 working but for the ddoser 3.6 the bot doesnt show up in the booter and ideas why ?

Anonymous6562 - March 17, 2012, 10:14 am

The download link doesnt work, says Zip file is invalid

iPePziiHD - September 26, 2016, 6:32 pm

i couldnt find the download on the origanal post so icame here thanks ;)
