How To Hack Webcams Using Shodan

What Is It?

A webcam exploit tutorial that I have used for the popular leak of the strip club cam I found about a month back. I still use this method today and have great success with it and now it is time I share a good HQ tutorial with my fellow HF members. My old thread where I released the popular strip club cam can be seen and located here. <https://hackforums.net/showthread.php?tid=3035567>

What Will You Learn?

In this tutorial I will teach you one extremely easy to use exploit method that will allow you to gain access to a huge verity of webcams all over the world.

Why I Am Leaking This Method

I decided to release my method because I no there are allot of members who are just starting out like I did 5-6 years ago and would love to come across a easy to use method like this. I also enjoy helping others anytime I can.

The Tutorial

OK so like I said this is one of the easiest exploit methods I know. This can be used to gain access to millions of webcams across the world.

Step 1

Go to the site you will be using to find the webcams and register a account. The site address is <http://www.shodanhq.com>

Step2

Click the Search directory at the top of the page in the menu

Spoiler [\(Click to View\)](#)[img]http://forum.uloak.com/upload/uploads/vk9zaj.png[/img]

Step 3

I find the easiest webcams to get into is on page 3, Click the webcam vipcap vilar

Spoiler [\(Click to View\)](#)[img]http://forum.uloak.com/upload/uploads/v6u78d.png[/img]

Step 4

You will now see hundreds of pages of webcams. You can start by clicking them and entering the default login admin:123456

Spoiler [\(Click to View\)](#)[img]http://forum.uloak.com/upload/uploads/istvdy.png[/img]

Step 5

You will see the webcam log in screen, Click user visit

Spoiler [\(Click to View\)](#)

Step 6

Use the default login details admin:123456 to log into the webcam

Spoiler [\(Click to View\)](#)

Step 7

Enjoy the webcam, You can move the cameras around all you want. If you want to give the cams out click the system setup and create guest and admin accounts. Guests can not move the camera admins can.

Spoiler [\(Click to View\)](#)

To Get The Most Results

Please note to have maximum search results you need to upgrade your account on there and it will cost 10 dollars but it is well worth it.

The End

And that concludes this tutorial. Have fun and be safe, the best cameras are the ones in the business that they get mad when you move them and keep putting them back to the normal position.

shiw4 - December 27, 2012, 9:47 am

nice tutorial but somehow I cant log into any Cams I think I tryed 30 different cams already but it always says "http://118.80.12.16 verlangt einen Benutzernamen und ein Passwort. Ausgabe der Website: "VIPCAM"

maybe they just changed the default settings and its a lot of work 2 finally find one with default settings ^^

but anyway nice Tut ;)

I bought that one yes because I use the xml's you can export to make shells. But you only need to spend \$10 and get 2 credits to upgrade the unlimited search results.

Good idea now you have so many more opportunity's.

SpaDeKo - December 27, 2012, 12:52 pm

Just as a little side-note. If you find something interesting, but without the default password for that piece of software - most of these are implemented without any kind of brute-force counter-measures.

Oh. And I find most user/pass combos to be admin/admin <-- Depends on what software you target of course.

Thanks for the Tut, mate :)

works, funny stuff. thanks for that. I have a lot of successful logins where the cam does not load. Any suggestions??

??? ??? - December 27, 2012, 4:51 pm

sometime the cam comes on at set points during the day. The account you get are admin account so you can change the settings. Some cams has the option to turn on and off.

Not all of them will work.If you read all the comments you will see I explained you will need to upgrade your account to get the best results. If you do not upgrade your account then you will not be able to see more the 3 pages of results. The first 3 pages every one uses so the best is after page 3.

Nice tutorial man this works like a charm, ive used shodan before to exploit webdavs but you made me see the sites true potential when I saw all those different things in the search directory. Also I was wondering if I could check out the strip club cam that you found (;

And here is a list of the cams that I found using this exploit for anybody who doesn't feel like doing it on their own : <http://pastebin.com/CbyLUkR7>
