Amazing share.

Especially the fact that it uses Live ID instead of Gmail (which was getting kind of common lately)

Secondly, the ANTI's option is totally awesome.

I'm download right now.

Q- Is it coded in VB?

Q- What more features will the Sell version provide?

Thanks

I don't mean to be a noob, but can someone direct me in the way of how i use this.

And in the server.exe part what am I to put there? I'm new and very leery at this. I'd rather not mess my own computer up. Anyway you can help me set this up ? I will be sooo grateful if you can.

EDIT : Lol 1st post ftw O-O been lurking the forums for atleast 1-2 weeks now lol!!

Su?ernatural - March 25, 2010, 5:21 pm

Spread the Server.exe

Anyone user that opens the server.exe they get keylogged.

failzathacking - March 25, 2010, 5:37 pm

Uhm, so if I named it Custom.exe (custom program) anyone opening that would be keylogged?

Or is it only server.exe?

How do I use a costum .exe file?

What if I wish to use a custom .exe file?

Aww dang, its a sharecash.org :(can never finish these surveys.
