Thread: [\[HOT\] Philipinian Govt. Site Hacked | dilgxi.org | \[HOT\]](#)

Doga - December 26, 2012, 10:34 pm

Hey HF,

Official site of DILG region <http://dilgxi.org/> , hacked by me, yeah PinguHash.?

As a proof I left my watermark [Hash], in the footer after 'Copyright 2012',?

they did real hard-work building this site, so I don't wanna be a jerk by deleting all and posting my bullshit deface.?

So, the site will be there for ever along with my watermark (unless some other Hacker hack it.)?

If anyone want any help regarding this kind hacks, post here...?

?Hycca - December 26, 2012, 10:36 pm

I don't understand, what do you need help with?

Doga - December 26, 2012, 10:38 pm

Sorry, lost in translation, i wanna write if anyone want any help regarding this hack....

?Hycca - December 26, 2012, 10:41 pm

(Dec 26, 2012 11:38 PM)pinguhash Wrote: [\[CITE\]](#) Sorry, lost in translation, i wanna write if anyone want any help regarding this hack....How are we going to help? You already did the dirty work..

Doga - December 26, 2012, 10:52 pm

? Why is it so hard to make people understand.

I was saying, if anyone want to hack something like I did, if they want any help from me, just post your queries here

thank you for your mental rape.. oh I mean rep

Becky G - December 26, 2012, 11:39 pm

All I wish to know is by what process did you accomplish this task?

Antimeta - December 26, 2012, 11:42 pm

Why is it this entire thread is smelling like bullshit.

ssyn.c - December 26, 2012, 11:49 pm

Good job. As its not very known to leave a tag behind but what a great idea.

Regards.

Illicit - December 27, 2012, 1:04 am

I like your method of defacement. Although how can we be sure 'Hash' was not already there. After all your alias is not just 'Hash'...

Doga - December 27, 2012, 1:08 am

Look what is there now,

I did this by gaining access to admin rights by an old Joomla exploit...

lolgt90 - December 27, 2012, 2:36 am

I want to learn this method please, if its okay for you. I am from the Philippines and it is one of our sites lol.

Doga - December 27, 2012, 2:45 am

Sorry, lolgt90 for hacking your country's site, but believe me I won't do anything wrong to site.

Hacked owner's email: found this site : tried his gmail password on Joomla with username:admin = worked (but limited permission) :

Looked at Global Config: got ftp info, but pass under asterisk : used 'BulletPassview' and had the ftp pass:

used filezilla to gain access to shit.

Sure man, add my skype bro? I've hacked, www.roblox.com as my most though, and a few vbulletin sites..

Add piayer98 on skype man.

lol, Says the kid with two posts.

35 fucking characters

Ronnie Coleman - January 1, 2013, 8:15 pm

Get off the internet attention whore skid.

Shiftex - January 2, 2013, 7:49 am

Nice deface could u please tell me if this website is defacable <http://www.lopolis.si/> (its a website for school where are stored estimates where your family can see how good you are at the school

or

Open Google type : "site:lopolis.si inurl:.php?" get a link like ".php?id=34", download Havij and search for SQL vulnerability...

If you wanna be a hacker, don't ask other's to do your dirty work

(Jan 2, 2013 11:05 AM)neonbyte Wrote: [\[CITE\]](#) Nice but how do you hacked owner's email??That question is irrelevant on this site... use search button ?

xTeamMGPx - January 2, 2013, 2:09 pm

Nice job man. It's nice that you didn't deface! :D

Dr.j4ck - January 3, 2013, 3:39 am

w0w nice pinguhash ... 1 ph government site .. down
