Hey Hackforums members i am releasing a pack i decided to gather up today of different Runescape fonts to be used for making a background in photoshop or whatever... :P this is my first post so i didn't wanna go big just small and helpful :P

2006 fonts :

2009 fonts :

2012 fonts :

(all of these images come in single letter images so you just drag them together with photoshop they also come with the swords the 2012 version has all the letters with a sword through it and all normal letters also so it can come in handy making a rsps client background or website background or whatever... :P)

i would show you guys an example font but my photoshop trial thing expired :/

Hope this helped one of you!

Would have been better if it was an actual text file & not just images. But ether way it's still useful!
