Yup if i were you i wouldn't trust myself neither...

Pops - December 28, 2012, 2:17 pm

Well I certainly don't trust you after what happened. The program is legit but you aren't an honest guy and you take advantage of people.

niether do i trust you, you helped me out with Mass Messaging, acted cool with me while actually reported my threads.

Let me guess you got jealous of the fact that many people quit using your Multi Tools and start using my Skype Tools.

I never 'acted cool' with you and I reported ONE of your threads for a very valid reason. And as far as Im aware, no one left my tools for yours, they left for SkypeCommander.

Yes some anti-virus's find this as virus because of the feature "Report Bugs" where you type in your email and pass, to report a bug...

- 1) I didnt backstab, you didnt give ANYONE credit so I took action against you
- 2) I wanted to be friends but clearly you didnt
- 3) I helped you when no one else would, so be grateful, according to you, people only helped you after I did

1) Yes you did

2) Yes true you were friend's with me, but i'm home schooled and i have 1000 other things i have to do, and instead of telling me that i forgot to put the credits, You just go and report my threads... i would have fixed it also if i noticed your message before 48 hours (i can't change threads in 48 hours)

3) Phantom helped me get a API and the other guy helped me build a resolver (before you gave me any help)
