Well i was going to sell the sms spoofer for cash but its effort and im already making loads of cash online.

Reply here THEN pm me and ill give you a credit to send a spoofed sms text message.

Example... Send it from +447970750321 (ben) to +447970750322 (dave) - Both take obv.. and if dave has ben on his contact list it will come up as ben on his phone! and he will reply to him if he replys..

Can also use names to send it from instead of numbers.

so if you made it say dude i think i have a crush on you.. cause some laughs..

Must have permission of who you use it on etc etc obv ;)

Works on all uk networks not sure about others..

These texts cost me money but i have some spare credits and i wana give some shit back to you guys.

1 sms for free to all leet / ubers.
