Thread: [Speed up your mobile by 50%](#)

Tooth Fairy - March 14, 2010, 4:49 am

This is only for those users which have memory card in their PHONESfirst of all you will need

-computer

-usb connectivity of MEMORY CARD TO PC(CARD READER) NOT BLUETOOTH

-little brain

Follow these steps:-

1.remove memory card from mobile.

2.insert it in CARD READER.

3.OPEN start menu>All program>acceSSories>system tools>DISK DEFRAGMENTER

4.Just run defragmenter at your memory card.

5.FRAGMENT IT 2 OR 3 TIMES.

6.PUT back memory card to phone.

7ENJOY THE "SPEED."

Loka~ - March 14, 2010, 5:46 am

Hah, Ive never taught of this... Gonna try it out later. :3

ssihiss - March 14, 2010, 5:48 am

yo my memory card was fucked up thank you , you should buy me one LOL

panakj - March 14, 2010, 11:48 am

better, u make backup of your files of memory card, then format the memory card and use it as you want, it will improve the speed as well

Weeds - April 26, 2010, 5:33 am

lol i use the disk defrag all the time but never on my phone, nice one ?

'HK. - June 8, 2010, 1:54 pm

Thank you, I might try this later. Hope it works (:

Tooth Fairy - June 8, 2010, 10:20 pm

It works,thanks for the feedback.

dogert - June 10, 2010, 4:20 pm

I think i might give this a try, my phone has been slow lately.

Slankey™ - June 16, 2010, 8:13 pm

It t'was so obvious that I never thought of it THANK YOU

Tooth Fairy - June 16, 2010, 9:49 pm

No problem Slankey, hope it works for you.

Breitling - June 17, 2010, 6:08 pm

Will this work on all phones ?

i may want to try this on my phone.. N900..

Breitling™

Tooth Fairy - June 17, 2010, 11:06 pm

I think it will work for you as well.

Kaleb - June 17, 2010, 11:09 pm

Lol, thats not a bad idea.

SIM-353284 - June 19, 2010, 4:29 pm

will it speed up my psp also ?

edit- i use the same memory card for both :) but will it speed it up ?

Tooth Fairy - June 20, 2010, 4:25 am

I think it will do the same for psp .

trojanman11 - June 28, 2010, 4:38 pm

just tried it with my blackberry, its not running any faster, but it didnt mess it up

KRB - July 6, 2010, 12:36 am

just spit balling here but i guess this isnt iPhone compatible

Pakland - July 7, 2010, 11:07 pm

damn, its so simple, lol why i never though of that earlier on..

MLGPROoCOM - July 8, 2010, 11:31 am

Can someone test this out and then post an update it seems like it will work in theory but just not sure about it ?

tum0r - December 5, 2011, 7:30 pm

This. SD cards are flash based. Meaning they don't benefit from data collection, as hard disks are. Defragment is designed to group together data on a spinning platter so that the arm(s) on the HDD don't have to physically move back and fourth as much. Defragging any flash media just decreases the life span of the memory. Everyone in this thread besides trojan placeboed. And yes, I apologize for posting in an old thread, but it angers me that people, even in our very community can fall for such crap.
