In what intervals...

I don't quite understand what you mean do you mean what unit of time does it send the emails in? if so minutes

Thanks. I will do. Me neither at the minute it can be quite monotonous however I am currently in the midst of adding icon changer screen capture FF stealer file pumper etc so once this is done it will be great once I have all that finished I will just be keeping the stub FUD.

Your Welcome Dude! Enjoy please post back with opinions

Doctorbio - March 17, 2010, 4:05 pm

I love the program, but there is a file called "file" and another called "server", both with the same icon. When I try to open either of them I get an error.

Code index was out of the bounds of array.

I get the options to:

continue(which does nothing)

quit (which well... quits?)

eXero - March 17, 2010, 4:20 pm

thats the custom error message i think. you also have just infected yourself.

Doctorbio - March 18, 2010, 6:32 am

I just killed it?

I didn't get an email about it?

D3r1v4t1v3 - March 18, 2010, 9:50 am

Yeah you have just infected yourself.....

Doctorbio - March 18, 2010, 5:07 pm

Alright. I un-infected myself, and I didn't get a log telling me what I did. I thought that the Neurotic sends me E-mails containing logs. Was I wrong?

D3r1v4t1v3 - March 18, 2010, 6:02 pm

Erm you kind of removed it. So it isn't going to send you logs is it?

??ID4RK-H4x0RI?? - March 21, 2010, 3:35 pm

Do i open the server.exe file 2 a pc i wanna infect? :/

It's either you .NET Framework needs to be updated or you Anti-virus is has corrupted the file, So if
your anti-virus is turned on, turn it off, re-download the keylogger and try again.

Good luck.

ConneX - March 24, 2010, 1:17 pm
