Thread: [How to create a colored outlining?](#)

**Hyphen** - December 31, 2012, 8:08 pm

How do you create a colored outlining on text or on an image? Like green or blue, etc. Something along the lines of this: <http://i.minus.com/jGRILdUnAADBg.jpg>

**Sejskaler** - December 31, 2012, 8:18 pm

Go to layer styles -> stroke

You get the layer styles by double clicking to the right of the thumbnail, you should know that

Then click the fill color, and change it, done.

No problem my friend, I am sincerly glad you could use it ^^

Just PM me, if any problem occur ;)
