Thanks for this tut been looking on how to flip items

Rel0ad - June 23, 2013, 3:18 pm

Thanks for this tuto

Nice effect ;)

The only thing is that reflections shouldn't be used with small cases.

Edit: Just read the second last line.

Very nice tutorial. May I suggest making another separation line tutorial, but include the white shadow you have underneath the first line in each tut.

I go over how to make the white lighting in another one of my tutorials. To put the 2 together you just erase the top of the lighting and align it with the bottom of the line.
