Thread: [Avast notification popup style | +source | screenshots | easy !](#)

anthoo12 - January 3, 2013, 6:47 am

If you don't know what is avast notifications, look at the screenshots, it's a popup message at the bottom right corner of the screen that scroll up, and scroll down.

I've added an opacity effect, just for fun ?

- For the release, I'm using 3 different popups, one big, one small, and one in French ?

- For the tut, I will use the small english popup only.

The screenshots :

all the images are hosted at imagetwist, be carrefull, look at the note, at the bottom of my topic*

Spoiler [\(Click to View\)](#)

The big popup :

[\[IMG\]http://img51.imagetwist.com/th/02720/la2ai5ar2711.jpg\[/IMG\]](#)

The small popup :

[\[IMG\]http://img51.imagetwist.com/th/02720/uyx5bly732da.jpg\[/IMG\]](#)

The French popup :

[\[IMG\]http://img51.imagetwist.com/th/02720/ahvert6hsd0o.jpg\[/IMG\]](#)

The Controls of the release :

[\[IMG\]http://img51.imagetwist.com/th/02720/cr3uocsp6z0d.jpg\[/IMG\]](#)

The control for the tut :

[\[IMG\]http://img51.imagetwist.com/th/02720/lk101irlvxma.jpg\[/IMG\]](#)

The link of the release :

<http://depositfiles.com/files/kh4epvjrt>

And the scan : <http://elementscanner.net/?RE=623fa9bd4489bca208221c294521bc47>

The tutorial :

1- Open a new empty form in visual studio, change the FormBorderStyle to FixedToolWindows (optionnal), and add a button.

Change the text of the button to "Show notification", like this :

[\[IMG\]http://img51.imagetwist.com/th/02720/8q0olvk7py50.jpg\[/IMG\]](#)

2- Click into the button, and add this code :

[\[IMG\]http://img51.imagetwist.com/th/02720/u4iv719zyu0f.jpg\[/IMG\]](http://img51.imagetwist.com/th/02720/u4iv719zyu0f.jpg)

when the button is clicked,

If the form2 is not visible, then the text of the button is changed to "Close notification", and the form2 is visible.

If the form2 location is "popped" (`Screen.PrimaryScreen.WorkingArea.Height - Form2.Height`) , then the text of the button is changed to "Show notification", and the form2 is visible.

3- Now, create the popup form, right-click to your project, in the solution explorer at the right of visual studio, and add a new windows form, called Form2.vb

In this form, add what ever you want, but for the tut, we'll add the Avast antivirus popup image in the background of the form, and resize the form at the image size :

[\[IMG\]http://img51.imagetwist.com/th/02720/ofaqlunsryg7.jpg\[/IMG\]](http://img51.imagetwist.com/th/02720/ofaqlunsryg7.jpg)

Now, you should have something like this :

[\[IMG\]http://img51.imagetwist.com/th/02720/tdyrhim5rwjx.jpg\[/IMG\]](http://img51.imagetwist.com/th/02720/tdyrhim5rwjx.jpg)

4- We have the Form2 with the avast popup design, but how to place it at the right bottom of the screen ?

We'll place it at the width of the screen - the form2 width.

The code will be :

`Code Me.Top = Screen.PrimaryScreen.WorkingArea.Height`

`Me.Left = Screen.PrimaryScreen.WorkingArea.Width - Me.Width` it in the load event of the Form2.

(Or write it yourself, better for understand and learn.)

5- The form is now placed correctly, we have to add the scroll effect :

Not very difficult, we add a timer that is always enabled (interval = 1), and when the variable called action = "up", then the form scroll up, and when the variable action = "down", then the form scroll down and close.

Don't miss to set the opacity of the form to 0%, it's for the fadein/fadeout effect ?

Here is the code to add in the timer event :

I've added some comments for understand.

[\[IMG\]http://img51.imagetwist.com/th/02720/o3j6vfqtby2q.jpg\[/IMG\]](http://img51.imagetwist.com/th/02720/o3j6vfqtby2q.jpg)

6- We can now add a PictureBox hover the cross of the avast image, for use it like the real avast cross. (don't miss to set the background of the pb at transparent)

and add this to the click event :

`Code action = "down"`

This tutorial is finished, thank you for reading ?

And sorry for my (very) bad english ?

*If you click the images, you can see X content, so be carrefull with underage people !

thank you man, you're the best ?

cyb3rpunk345 - January 3, 2013, 9:31 am

This is actually pretty neat! Great job :D

aneeshkollam5 - January 3, 2013, 9:41 am

Avast GUI is amazing,i had created a gui few months ago totally look like avast for a uncompleted project

[img]<http://img832.imageshack.us/img832/9600/cbmac.png>[/img]

very good !

I think if you post a topic, it will be probably famous ?

jessman420 - January 7, 2013, 10:17 am

Pretty cool nice share, I have been wondering how to do this.

Yui Asuna - January 7, 2013, 10:37 am

Hum hum :)

This thread is almost 5 years old. Why did you feel the need to post this useless comment?

Zythvx - February 2, 2018, 4:31 am

Are you a fucking retard?

“*If you click the images, you can see X content, so be carrefull with underage people !”, of all the providers, why are you using a fucking dodgy af provider???

because you like it isnt a real answer.....

use a real provider like imgur or something, there are soooooooooo many better providers
