Bump? I'm back online.

nshop1 - March 16, 2010, 8:12 pm

What about your previous keylogger builder? You are supposed to provide lifetime update on that. U have not replied my queries over there and started selling new keylogger! Please fix your previous one first, that doesn't provide any username/pass which I have shown with log file earlier.

Thanks

There aren't that many features actually. You limited the email function to Windows Live only, when you could've made it custom easily.
How much is it for an extra stub?
What are you using to change the icon, FlaSh's DLL?
Also consider adding a screenshot of the actual logs, so we know how clean they are..

ArmyyStrongg - *March 25, 2010, 3:06 pm*

ok so this doesnt support Gmail logs?

Indeed - *March 25, 2010, 10:58 pm*
