Thread: [Ebook Blackhat Make Money From Blogging/Article Writing](#)

asbogod - March 14, 2010, 11:09 pm

This is an e book I wrote on making money from blogging and online article writing, there are a few blackhat methods in there as well.

Sorry if there are any spelling errors that the spell checker didnt pick up, its 5 in the morning here and I haven't slept yet. It took me 2 hours just to write it.

The whole purpose of this E-book is to show people how to create articles without even having to write them and how to promote them using blackhat methods, after quickly going over it I noticed I had included my method of getting sharecash downloads as well.

Please don't put up any alternative download mirrors for this.

This is a sharecash download, just so you know.

Thank you, I hope you enjoy reading it,learn new things and also make money.

No its not, I personally wrote it. It took me ages to write it, I could have added more methods to it and went into detail a bit more but I'm too tired.

I assure you this is 100% made by me, there is no copy and pasting in it.

2 downloads, one from a premium user. Would one of them care to give me their opinion?

Also I just realized that where I wrote \$sharecash it has been replaced with spam...

If what you say is true about being 100% real content then you wasted your time. There isn't anything more you could cover that hasn't been already, especially the black hat methods. You're already posting a referral link in the first place which shows us that you have no real intentions of helping.

In order to help others you have to help yourself, otherwise people are just using you. Maybe everyone doesn't see it like that or that isn't their intention, but that's what I've learned from experience numerous times.

What the fuck are you on about? Stop sniffing glue and maybe you'll be able to write a logical sentence that isn't bullshit. Its because of lamers like you that I don't release my bots[/quote], the idea of people like you making money from me actually sickens me. Feel free to report me I haven't done anything wrong.

For the 3rd time, this is not copied. For anyone that wants a non \$sharecash link send me a PM. If I don't reply then you aren't getting it.

nitinrox2 - March 18, 2010, 1:56 pm
