Learn to write French and stops to take me for a fool.

I just do the right suspend you if you use a script nulled as WHMCS.

I received a complaint from WHMCS.com and warned me that if I suppressed not your files, I might a large almond.

I do not take any risks, I do not want closed.

hahahahah Are you kidding me? Do you have proof of that? I bet not give us a pic of the email / complaint from WHMCS I would love to see this.

And french lol people like you dont belong here if you use your brain you would know " We Speak English " not " French " on here. Get your facts strait and ur english.

Marketplace - January 9, 2013, 9:05 pm

Why would you use nulled WHMCS? You shouldn't make a hosting company if you cat pay for WHMCS. Using nulled is also dangerous because it can leak information.

Services - January 9, 2013, 9:21 pm

Phoenix-host.net is now unsuspended.

Cyber Duck - January 9, 2013, 11:51 pm

Why do you use WHMCS, There is no point. You will just get hate and no sales.
