Thread: [Trading spread method - female infections only! - Including FUD scripts](#)

**bish0p** - January 7, 2013, 2:39 am

Hi everyone.

I coded a method that will get you female victims for your RAT. It's fairly simple to use, but took me a long time to code all the FUD scripts you need for that.

However everything is included, Its easy to understand for everyone.

You can also limit to countries and so on.

What I am searching for is some Account upgrade, some crypter license or some VPN with portforwarding and stuff.

If someone would be interested, make me an offer via PM.

Regards

**fifman** - January 7, 2013, 6:42 am

Any proofs for your method? Anyone able to vouch for the method?

**bish0p** - January 7, 2013, 8:07 pm

Off course there is no vouch for this method.

Thats because I just finished the scripts and thats because all scripts are FUD.

I'm sorry no not be able to tell you anything more about it or not to have references but thats everything available.

Kind regards

bish0p

bish0p!d Suggest giving us some more information/proof on it. As people will be wary. Careful taking upgrades from other users, as if they do a chargeback to Omni, You get banned, not them.

Thanks for the hint.

I dont have anything to hide. Seriously this is proofed working but only by me.

Well i dont need to find someone to trade it. I can just use it myself until t gets detected and then rewrite the stuff.

Its really basic but however it works like charm.

I cant put more information and I think I won't.

But I'll answer as much questions as you like to ask.

Regards

Did you just say you coded a method?

What exactly do you mean?
