Thread: [NVPN/DARKCOMET RATTING TUTORIAL FOR NOOBS/BEGINNERS STEP BYSTEP!GOOD GUIDE 4BEGINNERS](#)

Cosa_Nostra - January 8, 2013, 7:03 am

Dear Hackforums,

Step one 1 , You need to port forward your router/VPN .

if you know how to do it then go to step 2, If you don't know how to do it watch this below.

If you are using a VPN (virtual private network) , Like for expamle
NVPN

[Click here if you don't know what a vpn is](#)

You need to buy nvpn for just 6-8\$ a month. check it out this tutorial is a bit based on the nvpn so.. that is what i use to be anonymous so just a suggestion. (i do not earn anything on promoting nvpn, but i just think it's an easy service and i use it myself .)

[Click here if you are interested in a vpn](#)

Port forward on NVPN

go to : [nvpn Login](#)

[img]http://img19.imageshack.us/img19/6048/tutorial1r.jpg[/img]

If you have an router use this site for help :

[Portforwarding help on Any ROUTER](#)

--

[Darkcomet DIRECT DOWNLOAD CLEAN](#) <---Download dark comet Direct link here

[img]http://img145.imageshack.us/img145/3519/tutorial2.jpg[/img]

[Port Checker](#) <--- Link Here

[img]http://img687.imageshack.us/img687/121/tutorial3v.jpg[/img]

--

Now Everything is ok We can make our no-ip client.

This will be our Dns host.

[If you don't know what a DNS host is Click me.](#)

Go to : [REGISTER NO-IP](#)

And follow the steps:

[img]http://img842.imageshack.us/img842/9831/tutorial4t.jpg[/img]

[img]http://img24.imageshack.us/img24/5264/tutorial5l.jpg[/img]

Now you have completed your DNS host, [Now Download you No-ip Client here!](#)

[img]http://img713.imageshack.us/img713/2523/tutorial6s.jpg[/img]

--

Now open your darkcomet again.

[img]http://img845.imageshack.us/img845/3798/tutorial7.jpg[/img]

[img]http://img515.imageshack.us/img515/8585/tutorial8b.jpg[/img]

This Rad is NOT FUD/UD

if you want to make your RAT FUD/UD?

Here is some Suggestions For a Crypter:

[Infinity Crypter](#)

[Xcrypter](#)

[Dark Eye Crypter](#)

I do not own the products used in this tutorial.

the credits must go to the rightfull owners and use the program at your own risk i do not take any responsibility whatsoever!

USE AT OWN RISK

Thanx For Watching My tutorial!

Hope it helped you !

spend alot of time making this!

Best Regards,

Machine Gun ?

mrhendooon - January 8, 2013, 7:49 am

nice guide will help out beginners like me to setting up R.A.Ts

Cosa_Nostra - January 8, 2013, 8:13 am

Dear, Mrhendooon

Thank you for The reply! :)

i hope it helped you,

Best Regards,
Machine Gun

If you don't port forward you wont be able to see any connections. <3

martinlumibao - January 25, 2013, 7:56 pm

I always get error when checking my port =(

sanzothe great - May 6, 2013, 12:11 am

sir can you help me to setup my darkcomet,,i already follow your steps ,port forward,check in canyouseeme.org.listen to port.close firewall,close aV but when i try it /double click it... nothings happen plss help me ...pm me i will send to you my teamviewer ID; ty

bayyak - May 6, 2013, 4:19 am

bro,please help me with this issue..i follow every single step and port im using is open(checked on multiple websites),av is disabled,no proxies,im using no ip updater program....

when i use the default ip in darkcomet 127.0.0.1(something like that) and test it on my own pc,it works normally but on other pcs it doesnt..but when i create a server with darkcomet using a host,it doesnt work neither on my pc or on other pc's..whats the damn problem ?

Thanks in advance...really appreciate help.

Jeryab - May 8, 2013, 4:29 am

I used about 10 vpn services, except nvpn none of them did not support port forwarding
