Thread: [\[SOURCE\]\[BETA\] Scribd.com Downloader \[FREE\]\[UPDATED\]](#)

GrOwlit - January 8, 2013, 1:13 pm

Hi all, today i present my last software:

SCRIBD DOWNLOADER

[img]http://i5.minus.com/i15aJXGlXKhZi.png[/img]

WHAT IS SCRIBD.COM

Scribd.com is "The World's Largest Online Library.". Here you can find tons of .pdf for all languages. To download from Scribd.com, you must pay (amount 9\$/monthly).

WHAT IS SCRIBD DOWNLOADER

Today, with my software, you can download easily and fastly from scribd.com, by a simple trick i (and many other people i think) have discovered.

If you are going to write that it doesn't work, well, study the source and fix it.

PUSHX - January 8, 2013, 1:16 pm

```
Dim WEBCLIENT = New WebClient()  
WEBCLIENT.DownloadFile("URL", "C:\")
```

What is the plus of your software ?

GrOwlit - January 8, 2013, 1:17 pm

(Jan 8, 2013 02:16 PM)PUSHX Wrote: [\[CITE\]](#) Dim WEBCLIENT = New WebClient()
WEBCLIENT.DownloadFile("URL", "C:\")

What is the plus of your software ?

Try to download something from scribd.com then tell me it again.

PUSHX - January 8, 2013, 1:20 pm

Arffff okay sorry im sorry ^^"

scribd is nothing for me ... :)

Bird Is The Word - January 8, 2013, 3:07 pm

Nice release Gr0wlit. :P
Thanks. :3

Coleak - January 8, 2013, 3:19 pm

(Jan 8, 2013 02:16 PM)PUSHX Wrote: [\[CITE\]](#) Dim WEBCLIENT = New WebClient()
WEBCLIENT.DownloadFile("URL", "C:\")

What is the plus of your software ?

What is the plus to you posting, you clearly are clueless on this topic, save yourself some time, and possibly some embarrassment and close your account (if that's possible).

TrackPro+ - January 8, 2013, 3:59 pm

SMH, anyway thank you gr0wlit, great release as always bro.

EpiCode - January 8, 2013, 4:52 pm

OK so you said their is a "trick" as i quote you.. but all i see in the source is Login details.... User and Password...

So i ask what is the trick?? Correct login details?? Imfao ..

TrackPro+ - January 8, 2013, 4:53 pm

(Jan 8, 2013 05:52 PM)EpiCode Wrote: [\[CITE\]](#) OK so you said their is a "trick" as i quote you.. but all i see in the source is Login details.... User and Password...

So i ask what is the trick?? Correct login details?? Imfao ..

Look at the source clearly and sdfu. ?

EpiCode - January 8, 2013, 5:01 pm

(Jan 8, 2013 05:53 PM)KungFuuPandaa Wrote: [\[CITE\]](#) Look at the source clearly and sdfu. ?
hmmm...i did, but just to shut you up i did look again.. I even changed the pass and username...
and guess what failed..

Code Sub login()

Dim Username = "someuser" ' "Gigiunzo"

Dim Password = "somepass" ' "leccaculo"

Dim token As String = GetBetween((New WebClient()).DownloadString("http://scribd.com")),
"<meta name=""csrf-token"" content=", "/>", 0).Split(Chr(34))(1)

Dim postData As String = "authenticity_token=" & token &
"&login_params%5Bnext_url%5D=http%3A%2F%2Fwww.scribd.com%2F&login_params%5Bcontext%5D=join2&login_or_email=" & Username & "&login_password=" & Password

Dim encoding As New UTF8Encoding

Dim byteData As Byte() = encoding.GetBytes(postData)

Dim postReq As HttpWebRequest =
DirectCast(WebRequest.Create("http://www.scribd.com/login"), HttpWebRequest)
postReq.Method = "POST"
postReq.KeepAlive = True
postReq.CookieContainer = logincookie
postReq.ContentType = "application/x-www-form-urlencoded"
postReq.Referer = "http://www.scribd.com/login"

```

postReq.UserAgent = "Mozilla/5.0 (Windows; U; Windows NT 6.1; ru; rv:1.9.2.3) Gecko/20100401
Firefox/4.0 (.NET CLR 3.5.30729)"
postReq.ContentLength = byteData.Length

Dim postreqstream As Stream = postReq.GetRequestStream()
postreqstream.Write(byteData, 0, byteData.Length)
postreqstream.Close()
Dim postresponse As HttpWebResponse

postresponse = DirectCast(postReq.GetResponse(), HttpWebResponse)
logincookie.Add(postresponse.Cookies)
Button1.Invoke(New MethodInvoker(Sub() Button1.Enabled = True))
End Sub
So as you say...

```

Look at the source clearly and sdfu. ?

electronZ - January 8, 2013, 6:19 pm

I have no use for it but I just wanted to make a suggestion. Instead of pasting in 1 url into the UI you should allow the user to either a) browse a text file full of urls or b) have a multi line text box to paste in urls which the bot will download for you 1 by 1.

cuz for example if I wanted to download 15 files it would be kinda slow.

just my 2c.

Kingstaa - January 8, 2013, 6:36 pm

Thanks for the tool. I have tried to download couple of pdf files and I am keep on getting message, that this is not a valid PDF when opening with Adobe Reader.

For Example this url: <http://www.scribd.com/doc/95601562/TelToneTLS-5>

Adolf Hipster - January 8, 2013, 11:57 pm

I dont see why that is needed since he has already provided us with the basic, and the most important functions. If you'd like your program to do that, it's not hard at all to make yourself and just add to this existing source.

TrackPro+ - January 9, 2013, 4:08 am

This is why i've put [BETA] in the main title. A new .exe (WORKING RIGHT NOW) and a new source is available in downloads. Enjoy this, and for all: Study how it works, if it doesn't work anymore, well.. fix it.

DotNetNut - January 9, 2013, 12:29 pm

(Jan 9, 2013 05:08 AM)KungFuuPandaa Wrote: [\[CITE\]](#) You're a dumb ass, provided half of the source. Provide all of it and then talk shit.

Wow your a dumbass....

Just checked the code myself and that epi guy is right its a POST login request, which then uses the stored cookie to login with each download request....

Check the source if you know how to read source that is.... Imfao (i think not) ..

EDIT:

In addition

Code Dim Username = "asfwsvger" 'Put here the username of your scribd.com account

Dim Password = "leccaculo" 'Put here the password of your scribd.com account (Upload at least 1 pdf on their site before)

Clearly their is no "trick" as mentioned in the OP's post. If anything its a mistake on the developers end allowing this sort of action.

EDIT 2 : At op Although their is clearly no trick, The source is at least nice, simple and a good example for the noobs.. Nice work will give them an idea of how to complete similar tasks.

The simple trick (that you can understand IF you read all the source) is that if you register a new account, then upload something legit, you can (grabbing a token from a webpage), download free pdf, that is not allowed for normal users. If you find it useless, please, leave this thread.

TrackPro+ - January 9, 2013, 2:24 pm

(Jan 9, 2013 02:05 PM)Gr0wlit Wrote: [\[CITE\]](#) The simple trick (that you can understand IF you read all the source) is that if you register a new account, then upload something legit, you can (grabbing a token from a webpage), download free pdf, that is not allowed for normal users. Its not a trick

your just grabbing a needed token from the webpage for the d/l.

Also i never said it was useless did i??

I mearly enquirerd about the so called "trick", then this guy in your thread jumped on me so i answered him .. , like i said it was a nice source for the noobies at no point did i say this was bad or your bad etc.

Spadassin150 - January 9, 2013, 8:01 pm

Nice release brother keep going

vastolord - January 11, 2013, 3:14 pm

Thanx, but can you post another link? MF not working ...

[img]http://img32.imageshack.us/img32/77/capturepgl.jpg[/img][[/align]

Adobe Reader could not open <filename> because it is either not a supported file or because the file has been corrupted (for example, it was sent as an email attachment and wasn't properly decoded).

XmysteriousX - January 12, 2013, 7:42 am

thank you gr0wlit, great release bro.

vastolord - January 12, 2013, 7:54 am

please, can you download and upload this for me ...

<http://www.scribd.com/doc/81972435/Colle-4-1-2012-Corr>

Thank you =)

Pingudo - January 26, 2013, 7:09 pm

This is great but can you download from files with a price tag??

freshkid87 - February 2, 2013, 4:09 pm

<http://www.scribd.com/doc/110003049/COM155-COM-155-VERSION-4-Week-7-Rough-Draft> i need this bro.

Foursenal - February 2, 2013, 6:32 pm

Works great. Haven't seen these - ever!

doesnt even work lol i tried it and it failed numerous times

Foursenal - February 4, 2013, 6:55 am

Worked for me o-o Ask OP for some help if you want

GrOwlit - February 4, 2013, 10:23 am

(Feb 4, 2013 07:25 AM)freshkid87 Wrote: [\[CITE\]](#) doesnt even work lol i tried it and it failed numerous times

Just download the source and take a look! I wrote it clearly,

- 1) create an account,
 - 2) Upload 1 .pdf into their website
 - 3) put your credentials into the source.
- END.

Plus, if you want to make this "long lasting", connect it to your online database, make every day 1 account and upload a .pdf into their website, then put the credentials into your db and pick it from the program. This is just an idea.

freshkid87 - February 8, 2013, 9:50 am

ive tried to edit for the form and it jus crashes what am i doing wrong
anyone there to help at all? i could really use it
hello? CAN SOMEONE PLEASE HELP ME OUT WITH A TUTORIAL PLEASE
