Didn't see that but that's like a year ago. He probably don't host anymore and he doesn't have a

domain which is "unofficial"

akakira - January 9, 2013, 8:18 am

Vouch, great service and quick answers.
Super website and great coupon !
In one word: GO GO GO !

Most hosts don't allow stressers but we do

Cyber Duck - January 9, 2013, 10:16 pm

its illegal in USA to host Network Stressers. It's only a matter of time untill you get closed down.

Congrats on leet, but of all of stressers I hosted, they never got shutdown

Cyber Duck - January 9, 2013, 10:20 pm

Thanks, Yeah its because obviously nobody has reported you/found you.

Soon enough you will get closed. NOTHING illegal is allowed on USA Hosts. I would recommend getting Romania or Luxembourg for illegal stuff.

I'll change it when I need to but for now, it's fine

Cyber Duck - January 9, 2013, 10:24 pm

Yeah, I am just warning you and to expect it soon.

Services - January 9, 2013, 10:44 pm

The server is not located to USA

Xtreme-HOST is hosted by CAT-HOST CANADA.

Cat-HOST Server located at Beauharnois OVH CANADA

Cyber Duck - January 9, 2013, 10:46 pm

Why does it say that it is located in USA on the thread then?.

<http://prntscr.com/op0im>

Services - January 9, 2013, 11:03 pm

Search cat-host.ca , server is located : Canada not USA.

Cyber Duck - January 9, 2013, 11:04 pm

Yes, But it says on the thread USA New York. You should change that.

Services - January 9, 2013, 11:05 pm

It's probably errors.

I ask with him soon.

Cyber Duck - January 9, 2013, 11:09 pm

Yeah, Just a bit confusing :D.

Good luck with sales from me :D

It says US because it's checking my website from an internet area around new York, us. I can change it to San Francisco or something else.

"Xtreme" is commonly used by Cunningham, I don't think he'll be happy you using his name.

Please don't get this started again. "Xtreme" doesn't belong to him and it's just a word so anyone can use it like "Stresser" or "Host"

Angel Beats?? - January 10, 2013, 9:25 am

Once again you are wrong. Cunningham owns Xtreme host and has done for ages. Also nice cooltext logo.

Cyber Duck - January 10, 2013, 9:34 am

Stop moaning to him. If the domain works it isnt taken. Simple

It's not the domain, it's the name. Do you know how a business works?

He didn't even have a domain and he shut down so anyone can take the name up for grabs. I didn't even know there was another hosting called Xtreme. Like since mega upload or co.cc is down anyone can use the company name. If he didn't want anyone else to have Xtreme then he should have bought all the domains of Xtremehost.net/org /com, etc

Your website shouldn't be down. Our servers were up all day. You can't access our website because our website is currently getting ddosed but your website should be fine as with other client's websites too. Also, our cPanel and WHM shouldn't be down. So it's either you entered the wrong DNS or you're doing something wrong.

Negative.

Fix the issue please, or I will just switch host.
