When i try load MySQL

Error

MySQL said:

#2002 - No connection could be made because the target machine actively refused it.

The server is not responding (or the local server's socket is not correctly configured).
Connection for controluser as defined in your configuration failed.

Any help would be greatful =}

Edit:Seem's to let me load it on firefox but not chrome -_-

Are you entirely sure that that's not an old error log, and that your mysql server failed to start?

Check the Xampp control panel, it should be highlighted in green.
