Thread: [imgur api screen capture region](#)

Golzer - January 9, 2013, 6:51 am

So I try to making imgur uploader with region selection I have the code and all but still dont know how to do that? any ides help?

Meerkat.? - January 9, 2013, 7:04 am

So... What have you tried? You don't expect us to spoonfeed you the answer right...?

Just find out how to capture a specific region. Once you know that, find out a way to select the area you want.

There's plenty of tutorials on HF about this, so I can't imagine there's nothing on google.

Golzer - January 9, 2013, 7:22 am

Yh I know how to do all this things the problem I want to make after the region select its gonna auto upload to imgur..

tweety - January 9, 2013, 8:23 am

Use Runtime GDI and click events. Easy as pie. Draw a rectangle and on mouseup event you have your upload event from the rectangle.

Golzer - January 9, 2013, 8:50 am

(Jan 9, 2013 09:23 AM)Tweety. Wrote: [\[CITE\]](#) Use Runtime GDI and click events. Easy as pie. Draw a rectangle and on mouseup event you have your upload event from the rectangle.

Its work:D But how I do it to automatic open the URL?

Venom69 - January 9, 2013, 8:52 am

you know there is a program called sharex that does exactly this...

tweety - January 9, 2013, 8:54 am

(Jan 9, 2013 09:50 AM)Golzer Wrote: [\[CITE\]](#) Its work:D But how I do it to automatic open the URL? Umm.. Process.Start()..?

I mean.. I have nothing to say, never mind.

Golzer - January 9, 2013, 8:56 am

Do u have skype? to help me just with that please?

Because its not just copy the url..

tweety - January 9, 2013, 8:58 am

(Jan 9, 2013 09:56 AM)Golzer Wrote: [\[CITE\]](#) Do u have skype? to help me just with that please?
Process.Start("www.google.com")

I will not be adding you on Skype for something as easy as this.

Golzer - January 9, 2013, 9:01 am

(Jan 9, 2013 09:58 AM)Tweety. Wrote: [\[CITE\]](#) Process.Start("www.google.com")

I will not be adding you on Skype for something as easy as this.
but its going like this what in need to do?

soo what I need to add to the process.start()?

tweety - January 9, 2013, 9:08 am

Remove MsgBox() and add this line in it's place:

PHP Code

```
<?php
```

```
Dim responseString As String = responseReader.ReadToEnd
```

```
Process.Start(Split(responseString, "<original>")(1).Split("<")(0))
```

Golzer - January 9, 2013, 9:13 am

```
<?php
```

```
Process.Start(Split(responseString, "<original>")(1).Split("<")(0))
```

Thanks but what responseString? can u just tell me that? please I will appreciate that :)

tweety - January 9, 2013, 9:14 am

(Jan 9, 2013 10:13 AM)Golzer Wrote: [\[CITE\]](#) Thanks but what responseString? can u just tell me that? please I will appreciate that :)

You take the response and that contains the url with your image along with the full response. You just need to split it out and grab the url itself.

Golzer - January 9, 2013, 9:17 am

(Jan 9, 2013 10:17 AM)Golzer Wrote: [\[CITE\]](#) Man I'm so noob in this stuff can you help me with that please?

How hard is it top copy and paste what I wrote man?

EDIT: Whoops sorry, I see what I did wrong. I fixed my post here, scroll up.

Golzer - January 9, 2013, 9:24 am

EDIT: Whoops sorry, I see what I did wrong. I fixed my post here, scroll up.

So what can I do here?

tweety - January 9, 2013, 9:26 am

(Jan 9, 2013 10:24 AM)Golzer Wrote: [\[CITE\]](#)

So what can I do here?

Remove the quote marks from the start of the braces within Process.Start() and at the end.

Golzer - January 9, 2013, 9:28 am

(Jan 9, 2013 10:26 AM)Tweety. Wrote: [\[CITE\]](#) Remove the quote marks from the start of the braces within Process.Start() and at the end.

I fix it but its still dont open the URL in the browser..

tweety - January 9, 2013, 9:38 am

(Jan 9, 2013 10:28 AM)Golzer Wrote: [\[CITE\]](#) I fix it but its still dont open the URL in the browser..

Pm me your teamviewer.. I'm delaying my lunch now.. -.-

(Jan 9, 2013 10:38 AM)Tweety. Wrote: [\[CITE\]](#) Pm me your teamviewer.. I'm delaying my lunch now..

-.-

Ok I sent u "D please help me :D thanks D"D

Adolf Hipster - January 9, 2013, 10:25 am

(Jan 9, 2013 10:01 AM)Golzer Wrote: [\[CITE\]](#) but its going like this what in need to do?

soo what I need to add to the process.start()?

Add Process.Start(Repsonsefromserver) after the messagebox.

This is great.

I love to see these new ppl do this.

I need help!

*op gets help

I cant figure it out

*op gets more help

I still cant figure it out, lets skype

*op gets even more help on skype

I still cant C&P everything together, TV me

*op gets his whole app coded for him and still hasent learned anything.

That's exactly how it is, people need to do their research before they come on here asking simple questions that have been released more than 500+ times. ???

If you read my comment you would know, as I said. I thought C# and VB.NET had the same syntax and I was just starting learning those languages in dept at that time. ROFLMAO. Never offended boy, haters will hate, not saying you're one. Just saying. :)

Superuser - January 9, 2013, 3:53 pm

Spoiler [\(Click to View\)](#)

You should stop posting bullshit when you are doing bullshit yourself.

//edit

You could help yourself by using Google.com. Lets just kill this conversation? There's no idea to keep talking.

TrackPro+ - January 10, 2013, 2:07 am

Haha you're a dumbass, Quentin gave me rep for no reason. SuckMyWangJD =D gave me rep because in a thread I said "Nvm, I will help my self instead." Man gtfo, you dumb fuck. You don't know shit about me, so again, HOP OFF. FUCKING DICK RIDER.

RelationShit - January 10, 2013, 3:07 am
