Thread: [\[Free\] How to get loads and loads of twitter followers free and easy! \[HOT\]](#)

Para?more - January 9, 2013, 10:08 am

Simple!

What you want to do is go to [Mass Twitter Followers](#) sign up, get your followers now this is where we can get more.

Change your twitter username again, plus you need a new email address so I recommend [this place](#). Resign up and do it again, you can do this as many times as you want!

2 weeks ago I tried and I got a real 900+ boost, now it's like only boosting 200 when I tried it for my friend, sadly.

Anyway are you sure this method works? I tried before using a different username but it seems that they're using the same 1000 accounts to follow FREE users. So I didn't see any changes. Hmm.

Really hot ,, I got 200 followers. Thank you for sharing with us.

I change my user name or email but still that message appear "Sorry you already got your followers"

Elweth - January 11, 2013, 4:56 am

One thing to point out, I think the 1k free accounts are being updated once in awhile as the 'botted' accounts gets suspended. Hence, all you got to do is go MTF and run the bot once a week, you should be getting new followers.

Tell me if my theory is wrong, I just tried out and it works.

Not all of them are bottled. :P A few are but I have a different theory but idk. I think that when you log in it saves your twitter stuff and you become the botting to the bottled
