Some fool say's that the pack is infected, of course it should be infected it's a backpack what do you expect some games and movies? ? Read the contents of the backpack you can see that it has CYBERGATE and DARKCOMET which are detected by AVs including some of the BRUTEFORCERS in it.!

Hack Pack for FREE!!!

This is my first thread and I'm going to make it a little bit HQ. ? So I have Collected tools from different places including here.

NOTE: I don't OWN any of this TOOLS all credits goes to the owners and coders. ?

DONT TRUST THIS. I JUST GOT MALWARE ON MY DESKTOP AND I CANT USE NEW TASK OR ANYTHING. Some of the programs are infected. you have posted a infected thread. Now plss remove it from my computer. couse many things are infected and broken now. and ur the only one who can remove it. so plss now remove it. its not [size][font]and in the rules says 1. No posting of fake programs.

2. No posting of HF member copyrighted work.

3. Do not post infected links.

Sorry, I wasn't terribly impressed. A bunch public versions and outdated skid tools that have floated around forever. I know this post isn't new, but There's nothing here that's any better than anything I already had. Nor is there anything here that's hard to find.

Thanks anyway!

OP says on the first page that he can't do a virus check. It's full of programs used for hacking so it'll come up as a virus everywhere. I can confirm it is virus-free.

Just gonna say that some files fucks your pc up bad. Had to reinstall EVERYTHING.

Even though some keyloggers are legit and work, I don't recommend using it if you are inexperienced in hacking cause your gonna get your shit stolen.

Of course the pack is infected, its filled with viral code and hack tools.

- Common sense.

If your TRYING to download a virus, your going to get an infected file.

@OP I am amazed this download is still live. Thanks for the share, I am sure many are well outdated given the posting date, but some very useful tools included as well.

Cheers ?
