Thread: [??? \[Free\] Virus/RAT Removal | Error Fixing | Whitehat \[PM, Skype, TV\] ???](#)

Antigen - January 10, 2013, 7:12 am

Hi,

I used to see many members asking for help with possible virus/rat infections, I'm opening this help desk for all members who need help. I know this thread is going to get buried but I hope I can help with some. I do have experience in related fields as some of you may know and I'm good at this.

I know there is already a dedicated team and some help desks for this but I think they wont provide support for minor problems like error fixing etc.

How can I contact you ?

Please post your problem here and I'll PM you personally to resolve the issue, I'll contact you by skype /Team Viewer if it's necessary.

I'll help as much as members I can, I'll contact them by PM/SKYPE/Team Viewer in order to resolve problem as soon as possible.

I can help you withVirus/Malware/RAT/Keylogger

PC problems and errors

Whitehat solutions

Thank You

Sorry, but usually threads like these get buried pretty quickly (people can just create their own threads about their problem). Anyways, thanks for the service ?
