Hi,

I`m curious and also a newbie with all the terminology and the usage of a VPN.

Please tell me what does unlimited speed stands for when we are talking about a VPN.

Will your VPN help me get a faster access to a website? At the moment I have 30Mb bandwidth and I can` t get access to that website as it is overloaded - but other people do. Will this VPN help in any way ?

Thanks

I bought lifetime but I formatted my SSD and I forgot to save the files from the vpn. Now I have everything in a .rar file but it's password protected and I can't remember the password. Maybe the seller has put the same password on all the .rar files he has sent, so can someone check the messages with him and tell me if you find it. I'll really appreciate it if you help me guys!
