Thread: [FUD Silent java drive by not patched.](#)

TheExclusive - January 11, 2013, 12:04 pm

I have a Fud silent java drive by.

It use an exploit what is currently not patched so you can catch a lot of people with it. Anyone interested it this exploit ?

Let me guess it's this: <https://github.com/rapid7/metasploit-framework/pull/1286>

It's the new Java vuln released yesterday on 10.01.2013
