Thread: [\[TUT\] How to setup a PPTP VPN + free vpn \[NO LOGS\] \[TUT\]](#)

Zap~ - January 12, 2013, 9:03 am

I will be telling you how to do this on Google Chrome, but it is basically the same thing through out all browsers.

Go to settings
then scroll down until you see Network
Hit "change proxy settings"
Hit "Add VPN"
Put "euro2.vpnbook.com" as the internet address.
You can name it whatever you want then hit next.
Then put in this information.
Username: pptp
Password: 9jHbfKiN
Hit remember this password and hit connect!
You are now are on an anonymous encrypted vpn that does not keep logs! Congrats!

If feel like downloading something you can get OPENVPN from the source and protect your whole computer.

It was going fine, then somehow lost conection :/

NeoSnw - January 12, 2013, 9:36 am

I can vouch this works, thanks a lot for sharing OP!

I3lue.Lem0nz - January 12, 2013, 9:45 am

Nothin VPN is free. There has to be a catch, thanks for the share though. Why doesn't euro1 work?

Zap~ - January 12, 2013, 9:46 am

I know it went down for a little bit. It is back up again!

(Jan 12, 2013 10:45 AM)I3lue.Lem0nz Wrote: [\[CITE\]](#) Nothin VPN is free. There has to be a catch, thanks for the share though. Why doesn't euro1 work?It is completely free. I have no clue why euro1 doesnt work.

rfpd - January 12, 2013, 10:32 am

It works also check if your dns is leaking <http://www.dnsleaktest.com/> if u find more than one conection it's leaking check the "How to fix a DNS leak" tab.

ISk8Bro641 - January 12, 2013, 1:41 pm

Thank you so much for this, finally a good free VPN!

TimefliesDesigns - January 12, 2013, 1:54 pm

Thanks for the tut, I've been looking on how to do this :)

LxeProxy - January 24, 2013, 6:19 pm

Why on earth would anyone use PPTP? Low levels of encryption. Open ended handshakes. Easily cracked encryption algo's/ciphers.

It just makes no sense.

It just makes no sense.You only really use it to spoof your IP.

Turtle™ - January 25, 2013, 3:45 pm

This is so slow! And like the user above you said, it has low level of security/encryption. Why not just use free hot spot shield or [censored]? However, I appreciate you giving back to the community, the good thing about this method is that you don't have to download or install anything. But this is the connection when I am connected to it...

> VPN

> No Logs

That is not true, every VPN provider leaves logs.

Zap~ - January 25, 2013, 5:54 pm

No, nVPN does not save logs.

Also, make sure to stay safe as well. Some PPTP vpn's can be vulnerable. ?

Zap~ - January 25, 2013, 7:08 pm

Where in my post did I say you used 1 vpn.. ? Anyways, it still doesnt matter someone can exploit your VPN and get to your proxy & most people use SOCKS5 proxies & SOCKS5 proxies are vulnerable to buffer overflow, if you use Tor. That is vulnerable to Heap Base Buffer overflow & some other things - <http://www.securityfocus.com/bid/51097>

SOCKS5 Buffer Overflow -

http://www.cvedetails.com/product/2687/Socks5-Socks5.html?vendor_id=1567

All im saying is, "No one can be 100% anonymous". There are always ways to get pass.

All im saying is, "No one can be 100% anonymous". There are always ways to get pass.Well, obviously everything is exploitable no matter what you're doing.

axmetmcl - January 26, 2013, 4:55 am

thanks dude when i need a free vpn i will try that

Zap~ - January 26, 2013, 6:28 am

(Jan 26, 2013 05:55 AM)axmetmcl Wrote: [\[CITE\]](#) thanks dude when i need a free vpn i will try that This VPN is pretty weak and shouldn't be your only security get security kiss, spotflux, cyber ghost, proxies. All running at the same time to be ultra safe lol.

4RG0S - January 26, 2013, 6:33 am

Vouch this works and thanks for the TUT :)

WardM5 - January 26, 2013, 7:07 am

Thanks for the tutorial! Its really fast and safe!

Coconuthead93 - January 26, 2013, 7:14 am

i keep getting"connection failed with error 619"

Zap~ - January 26, 2013, 7:54 am

(Jan 26, 2013 08:14 AM)Coconuthead93 Wrote: [\[CITE\]](#) i keep getting"connection failed with error 619"Your port is not open, do you have another VPN running? If so do this one first and then that one.
